Paul Meadlo during his broadcast interview.

Ex-GI Tells U.S. He Killed Women, Babies at Song My

NEW YORK, Nov. 25 (NYT).—A 22-year-old ...abled Army veteran said yesterday that he ...d killed "ten or 15" men, women and children ...ring the alleged massacre in March, 1968, in ...e South Vietnamese village of Song My.

"Why did I do it?" the veteran, Paul Meadlo ...Terre Haute, Ind., asked during an interview ...ith the CBS radio network. 'Because I felt ...e I was ordered to do it, and it seemed like ...at, at the time I felt like I was doing the ...ght thing, because like I said I lost buddies.

"I lost a damn good buddy, Bobby Wilson, ...nd it was on my conscience. It was on. So ...fter I done it, I felt good," but later on that ...ay, it was gettin' to me."

Mr. Meadlo said he was ordered to kill ...sidents of the village by 1st Lt. William L. ...alley jr. of Miami and that Staff Sgt. David ...itchell, 29, of St. Francisville, Fla., was in ...harge of his squad.

Lt. Calley and Sgt. Mitchell have been charged by the Army with assault with intent to commit murder in connection with the case, and Lt. Calley, 26, was ordered yesterday to stand general court-martial.

Mr. Meadlo reported that on the day after the alleged massacre he stepped on a land mine and subsequently lost a foot.

Mr. Meadlo, who said he has a wife and two children—a boy two and a half and a girl one and a half—said he was in the first wave to reach the village by helicopter.

He said that after one villager—"an older man"—had been shot, about 40 to 45 people were gathered in the center of the village. There were men, women, children and babies.

He said: "And we huddled them up. We made them squat down, and Lt. Calley came over and said, 'You know what to do with them, don't you.' And I said, 'Yes.' So I took it for granted that he just wanted us to watch them.

(Continued on Page 2, Col. 1)

Interview With the Ex-GI

...EW YORK, Nov. 25 (NYT).—...e following is a transcript ...n interview of Paul Meadlo, ...nam veteran, by Mike Wal..., on the Columbia Broad...ing System radio network:

...llo: Capt. Medina had us all ...a group, and oh, he briefed ... and I can't remember all ... briefing.

...ace: How many of them ...re with you?

...llo: Uh, well, uh with the ...rtar platoon, I'd say there'd ... about 65—65 people, but ... mortar platoon wasn't ...h us. And I'd say the ...rtar platoon had about 20—...about 25 people in the ...rtar platoon. So uh, so we ...n't have the whole com...ny in the Pinkville, so we ...n't.

Wallace: There weren't about 40-45 . . .

Meadlo: . . . Right . . .

Wallace: —that took part in all of this?

Meadlo: Right.

Wallace: Now you took off from your base camp—

Meadlo: . . . Yes—Dolly.

Wallace: . . . Dolly. At what time?

Meadlo: Uh, I wouldn't know what time it was . . .

Wallace: . . . in the early morning . . .

Meadlo: . . . in the early morning. It was—it would have been a long time ago.

Wallace: And what had you been briefed to do when you got to Pinkville?

Meadlo: To search and uh, uh, to make sure that there weren't no NVA [North Vietnamese Army] in the village and 'spectin' to fight—when we got there . . .

Wallace: To expect to fight?

Meadlo: To expect to fight.

Wallace: Uh-huh. So you took off and—in how many choppers?

Meadlo: Well, I'd say the first wave was about four of us—I mean four choppers, and uh . . .

Wallace: How many men aboard each chopper?

Meadlo: Uh, five of us. And, uh, we landed next to the village, and we all got on line and we started walking toward the village. And there was one man—one gook in the shelter, and he was all huddled up down in there, and the man called out and said, "There's a gook over here."

Wallace: How old a man was this? Would you imagine? I mean was this a fighting man or an older man?

Meadlo: An older man. And the man, hauled out and said that "there's a gook over here," and then Sergeant Mitchell hollered back and said shoot him.

Wallace: Sgt. Mitchell was in charge of the 20 of you?

Meadlo: He was in charge of the whole squad.

Wallace: Uh-huh.

Meadlo: And so then the man shot him. So we moved on into the village, and we started searching up the village and gathering people and running through the center of the village.

Wallace: How many people did you round up?

Meadlo: Well, there was about 40-45 people that we gathered in the—in, like I say, in the center of the village. And we placed them in there, and it was like a little island, right there in the center of the village, I'd say. And—

Wallace: What kind of people—men, women, children?

Meadlo: Men, women, children.

Wallace: Babies?

Meadlo: Babies. And we all huddled them up. We made them squat down, and Lt. Calley came over and said, "You know what to do with them, don't you?" and I said "yes." So I took it for granted that he just wanted us to watch them. And he left, and came back about ten or 15 minutes later, and said, "How come you ain't killed them

...iet Cong Propaganda Units ...emand U.S. Pay in Blood

...HONG KONG, Nov. 25 (AP).—Three Vietnamese Communist ...aganda agencies today demanded "blood payments for the ...cent blood spilled by the U.S. fascist war criminals in the ...acre at Song My."

In what appeared to be a coordinated move, North Vietnam's ...o Hanoi, the official army newspaper Quan Doi Nhan Dan ...the Viet Cong's Liberation Radio urged "our fighting com...ots and our Vietnamese people to transform our just hatred ...st the U.S. fascists into determined strength that will kill ...rican and puppet (South Vietnamese) troops everywhere they ...et throughout our land."

"Blood must be paid by blood," said Quan Doi in a front-page ...mentary broadcast by Radio Hanoi.

Liberation Radio, the clandestine voice of the Communist ...Cong in South Vietnam, urged "the taking of the blood of ...e who spilled the blood of hundreds of our innocent people ...ong My."

All three told the Vietnamese Communists that the "bloody ...crimes massacre at Song My" has aided the cause of the ...munists in Vietnam. "It has revolted and alienated even ...e nations who have supported U.S. aggression in Vietnam," Liberation Radio.

"The people of the world," said Radio Hanoi, "will no longer ...oled by the Nixon administration's protestations that it is ...ing peace in Vietnam.

"The people of America will now more strongly than ever against those rulers who want to continue the war."

More Alleged Massacres Charged

TOKYO, Nov. 25 (UPI).—The Viet Cong's political arm, com...ing on the alleged U.S. killing of Vietnamese civilians at ...My village, said today that at least three other massacres ...ietnamese had occurred under American auspices.

...In a Radio Hanoi broadcast monitored here, the Provisional ...olutionary Government of South Vietnam said that the alleged ...My massacre was "only one of the innumerable bloody ...es perpetrated by the U.S. aggressors and their lackeys in ...h Vietnam."

It said, "The most typical cases are the massacre in Ba Lang, ...re over 1,500 people were killed, that in Kong Hring, where ...ly 1,500 people were killed or wounded, and that in the ...ns of Tay Ninh and Poulo Condor, where nearly 1,000 people ... killed or injured."

Bonn Bids For Dutch, Pole Amity

Offers Warsaw Full Negotiations

By David Binder

BONN, Nov. 25 (NYT). — The government of Chancellor Willy Brandt made bids of reconciliation today to Poland and the Netherlands, two embittered victims of Germany's World War II aggression.

As President Gustav Heinemann began the second day of a successful goodwill visit to Holland, Mr. Brandt's chief diplomat in Warsaw, Heinrich Boex, called on Poland's Deputy Foreign Minister Josef Winiewicz to deliver a note offering "comprehensive negotiations" to the Communist government.

The timing of these first foreign policy moves of the Brandt government, which took office only a month ago, appeared to be deliberate.

Both the Social Democratic chancellor and the Social Democratic president have indicated in the past that they were keenly aware of the resentment against Germany in Poland and the Netherlands since the Nazi era.

Official relations between The Hague and Bonn have been close and fruitful for years. But the ordinary Dutch still dislike Germans.

First Visit

Mr. Heinemann, the first German head of state to visit the Netherlands since Kaiser Wilhelm II in 1907, has been genuinely welcomed as a representative of the democratic spirit in this country. This marks what journalists of both nations have called a new era.

Bonn's approach to Warsaw is the first undertaken at the diplomatic level by the Federal Republic, which regards itself as the constitutional successor of Hitler's Third Reich.

According to a Warsaw dispatch by the West German news agency, DPA, Mr. Boex, who heads the West German trade mission in Poland, spent almost an hour conferring with Mr. Winiewicz.

Until today, Mr. Boex had been restricted in his contacts with his host government to the Polish Foreign Trade Ministry. His reception at the Foreign Ministry marked his acceptance as an envoy of the government rather than as a trade representative. The two governments have maintained trade missions since 1963.

In his initial policy declaration in October, Mr. Brandt said his government would ask Poland to join in a bilateral pact to renounce the use of force. He specified that such a pact should acknowledge the "territorial integrity" of the signatories.

Oder-Neisse Line

He repeated this in an interview over the weekend with the Polish Communist newspaper Zycie Warszawy, indicating that he viewed such a pact as a means of meeting Poland's demand that West Germany acknowledge the Oder-Neisse line as Poland's western frontier.

The Oder-Neisse line was drawn at Yalta in 1945 by Churchill, Stalin and Roosevelt as a temporary demarcation pending a final peace treaty with conquered Germany. Since then, the Poles have insisted that the Oder-Neisse boundary is final and they built up their "western territory" accordingly. But Mr. Brandt's conservative predecessors refused to accept the frontier.

Noting that the Oder-Neisse line is the frontier between Poland and East Germany, government officials here remarked that Warsaw's continuing insistence on its acknowledgment by Bonn is an unspoken indication that the Poles share the Federal Republic's view that it is the legitimate successor to the Third Reich.

Calley Retains Job With Army Pending Trial

FORT BENNING, Ga., Nov. 25 (NYT).—First Lt. William Laws Calley jr., who faces charges of the premeditated murder of at least 109 persons in the village of Song My, South Vietnam, will continue to work in an administrative job in the office of the deputy post commander while awaiting court-martial, it was learned yesterday.

He will be free to leave the post to visit nearby Columbus. But if he wants to leave the Fort Benning area, he will have to apply for permission, as all other soldiers on the post do.

An officer denied that this was unusual treatment for a man facing a court-martial for a capital offense, saying that "incarceration is only used to protect a man or to make sure he's available for trial."

U.S. Rejects Germ War, Will Destroy Stockpile

Associated Press.
THREE MORE LIKE BEFORE—The Hornet's skipper greets the astronauts on board. From left, in the quarantine module: Charles Conrad, Richard Gordon and Alan Bean.

Astronauts, in 'Excellent Health,' Follow Moon Rocks to Houston Lab

ABOARD U.S.S. HORNET, Nov. 25 (UPI).—The Apollo-12 astronauts were reported in excellent shape today as they cruised toward Hawaii after a ten-day, million-mile space voyage to the moon and back.

Doctors said, however, that Capt. Alan L. Bean suffered a half-inch cut above his right eye when he was hit by a camera at splashdown. He also had an inflamed ear, a result, it is thought, of the spacecraft's oxygen atmosphere.

Capt. Bean, Capt. Charles (Pete) Conrad and Capt. Richard F. Gordon all had minor skin irritations from biomedical sensors that were attached to their chests during the mission. This was not uncommon.

"All in all, they are in excellent health," said Dr. Clarence Jernigan nine hours after the astronauts were brought aboard this veteran recovery ship from their bobbing moon capsule.

"The crew feels fine and appears well rested," he added.

Capt. Bean's cut was stitched up and Dr. Keith Baird, quarantine control manager aboard the Hornet, said: "It is not considered of a serious nature."

Dr. Baird said Capt. Bean's ear problem was probably caused by spacecraft oxygen drying his mucous membranes. "We've seen this on other missions," he said.

Singing Captains

After being fished from the sea and whisked to the carrier, the astronauts had received a telephone call from President Nixon, who was on hand at Cape Kennedy for their takeoff 11 days ago and now promoted them all on the spot from Navy commanders to captains.

Mr. Nixon told them that he was sorry he couldn't be aboard the Hornet as he had been exactly four months ago when he welcomed the Apollo-11 crew back from the moon.

"You weren't the first on the moon," Mr. Nixon said, "but, Commander Conrad, you were the first to sing from the moon. We had the first moonquake and the first press conference from outer space.

"I've been trying to think of some way to recognize you, so exercising my prerogative as commander-in-chief of the armed forces, I decided you should be promoted, and from this day forth shall be known as Captain Conrad, Captain Gordon and Captain Bean. Congratulations."

Capt. Bean, at 37, is now the youngest peacetime captain in the history of the U.S. Navy, according to a naval spokesman. He also holds the record for rapid promotion from lieutenant commander to captain—having held the lower rank only five months.

Capt. Conrad spoke briefly by radio with Thomas O. Paine, administrator of the National Aeronautics and Space Administration today.

"Al [Bean] got whacked with a camera when we splashed down

(Continued on Page 2, Col. 6)

Astronaut Collins May Join State Dept. as Image Builder

WASHINGTON, Nov. 25 (WP).—The State Department is looking to an astronaut to give it a new space-age image.

Michael Collins, the Air Force colonel who piloted the Apollo-11 capsule while Neil Armstrong and Edwin Aldrin made man's first walk on the moon, has been approached to take over as assistant secretary of state for public affairs.

Michael Collins

Col. Collins, who was interviewed for the job in Washington last week, refused to comment yesterday on the outcome.

The idea is "unabashedly a public relations operation," one official said. "We've got a lousy image and we earned it, sending out stuffed shirts with phony British accents to represent the foreign service."

The assistant secretary's post Col. Collins would fill has been held on an acting basis by career officer Richard I. Phillips since Dixon Donnelley left in January to return to the Treasury. State's public affairs bureau no longer includes the news office but consists of various promotional offices which publish informational materials, provide speakers and handle other public contacts.

First-Strike Use of Gas Renounced

WASHINGTON, Nov. 25 (UPI).—President Nixon anounced today that the United States is renouncing the development of all germ-warfare weapons except for protective research as a peace move to prevent "massive, unpredictable and potentially uncontrollable consequences."

[The Soviet Union asked today at the United Nations for early conclusion of an international ban on the production of biochemical weapons.]

Mr. Nixon ordered the Defense Department to start planning now to dispose of all U.S. stocks of bacteriological weapons.

He said also in a special announcement that the United States would not use lethal chemical weapons such as poison gas except in retaliation. And he asked the Senate to ratify a 1925 Geneva pact prohibiting the use of germs or poison gas in war.

"Mankind already carries in its own hands too many of the seeds of its own destruction," Mr. Nixon said.

Peace, Understanding

"By the examples we set today, we hope to contribute to an atmosphere of peace and understanding between nations and among men."

The President said U.S. research in germ warfare would be limited to defensive purposes such as immunization and safety measures.

There was no immediate indication how the Pentagon would dispose of its present germ-warfare arsenal. There was a flurry of controversy earlier this year over the disposal of chemical weapons such as mustard gas as distinct from biological weapons.

In testimony released today by the House Appropriations Committee, the Army said it had spent $203.8 million in research for both chemical and biological weapons since 1963.

Mr. Nixon said U.S. intelligence agencies "will continue to watch carefully the nature and extent of the biological programs of others."

In addition to renouncing "first use" of lethal chemicals, the President extended the American position to first use of incapacitating chemicals.

Some Exceptions

That will not apply to tear gas, so-called riot-control agents and certain chemicals used against plant life.

The Geneva agreement was submitted to the Senate in 1925 for ratification, but no action was taken. The United States, nevertheless, says it has adhered to the principles of the pact even though it is not yet a signatory.

Russia subscribed to the Geneva protocol in 1928. China also has agreed to it.

Mr. Nixon made his announcement in person to reporters after a bipartisan meeting of House and Senate leaders, including members of Foreign Affairs and Armed Services committees.

Mr. Nixon said his decisions resulted from an extensive review of the biochemical-warfare policies and programs under the auspices of the National Security Council.

The President described his program as "an initiative toward peace." In his statement he said the United States:

- Reaffirms its oft-repeated renunciation of the first use of lethal chemical weapons.
- Extends this renunciation to the first use of incapacitating chemicals.
- Consonant with these deci-

(Continued on Page 2, Col. 6)

Solzhenitsyn Invited to Defect by Soviet Writers' Union

MOSCOW, Nov. 25 (AP).—A powerful Soviet writers' organization today accused liberal novelist Alexander Solzhenitsyn of being "hostile to the cause of socialism" and invited him to defect to the West if he wants to.

A harsh statement by the Writers' Union of the Russian Federation charged that Mr. Solzhenitsyn has "joined hands with those who oppose the Soviet social system."

Mr. Solzhenitsyn, whose last two novels are banned in the Soviet Union, was expelled from the Writers' Union Nov. 6. He claimed in a widely circulated "open letter" that he was expelled in abstentia and had no chance to defend himself.

The union today cited his letter as "proof of his utter disregard for civic duty, and direct transition to positions hostile to the cause of socialism."

The only Solzhenitsyn novel published here, "One Day in the Life of Ivan Denisovich," is no longer available. His current best-sellers in the West, "The Cancer Ward" and "The First Circle," have been circulated only in typewritten form in Soviet intellectual circles.

A summary of the union's statement, distributed by the official Soviet news agency Tass, charged further that the controversial author holds positions "alien to our people."

"Nobody is going to stop Solzhenitsyn and prevent him from going away," the Tass summary said, "even if he desires to go where his anti-Soviet works and letters are received with such delight."

The retaliation by the union, to be published in the weekly newspaper Literaturnaya Gazeta (Literary Gazette) tomorrow, could foreshadow further sanctions against him including his arrest on charges of anti-Soviet agitation.

Mr. Solzhenitsyn had warned in his open letter that Soviet society is "gravely ill."

"Wipe the dust off your watches," Mr. Solzhenitsyn wrote. "You are centuries behind the times. Throw open your beloved heavy curtains. You do not even suspect that the dawn has risen outside."

The union today rejected his claim that he was expelled in absentia as "nothing but a lie."

The union "acted in strict accordance with the union's rules," the statement said.

The reason given for Mr. Solzhenitsyn's expulsion from the union was his alleged portrayal of Soviet life in a "black way" and his failure to do enough to halt publication of his two novels abroad.

"Solzhenitsyn arrogantly disregarded the just criticism of the (Soviet) literary public," the union's statement today said.

"He did not stand up against the use of his name and his works by bourgeois propaganda for a campaign of slander against our country," it continued.

"Moreover, in his actions and statements he actually joined hands with those who are coming out against the Soviet social system."

By writing the open letter, the union said, Mr. Solzhenitsyn himself "reaffirmed the need, the correctness and the inevitability of his exclusion from the Soviet Writers' Union."

The union charged that his le...ter, which still is circulating in ...typescript among Moscow intellectuals, was "...ull of abuses, threats and pseudo-theoretical discourse."

Ex-GI Tells U.S. of Song My Killings

(Continued from Page 1)

And he left, and came back about 10 or 15 minutes later, and said, "How come you ain't killed them yet?" And I told them that 'I didn't think you wanted us to kill them, that you just wanted us to guard them.' He said, 'No I want them dead.' So."

Mr. Wallace said: "He told this to all of you, or to you particularly?"

Mr. Meadlo replied: "Well, I was facin' him. So, but the other three, four guys heard it and so he stepped back about ten, 15 feet, and he started shooting them. And he told me to start shooting. So I started shooting, I poured about four clips into the group."

Mr. Meadlo explained that he was firing an M-16 rifle, and under questioning he estimated that he had fired about 67 shots.

"Well," he said, "I fired them on automatic, so you can't—you just spray the area on them and so you can't know how many you killed 'cause they were going fast. So I might have killed ten or 15 of them."

Mr. Meadlo estimated that 370 persons were killed in the village during the day. He said that the company commander, Capt. Ernest Medina, was "right there" but did not put a stop to the shootings. Vietnamese civilians have told American reporters that 567 residents of the village were killed. One American who said he was an eyewitness has put the number at 100. The South Vietnamese government has declared that no massacre was committed in Song My by American troops on March 16, 1968.

Mr. Meadlo said that more than 70 villagers were taken to the edge of a ditch, pushed over, and shot with automatic fire, then single shots "so that we could save our ammo."

Mr. Wallace asked, "How do you shoot babies?"

"I don't know," Mr. Meadlo replied. "It's just one of them things."

'He Can't Live With Himself'

TERRE HAUTE, Ind., Nov. 25 (UPI).—The mother of a 22-year-old ex-soldier says her son voluntarily appeared on a television news program in New York, "because he has tried to get it out of his system since he has been back from Vietnam."

Mrs. Myrtle Meadlo of Terre Haute made the statement yesterday night after her son, Paul, told newsmen he participated in the alleged massacre of between 300 and 600 Vietnamese men, women and children at the hamlet of Song My in March of 1968.

Mr. Meadlo's mother told newsmen here her son went to New York because he said he can't live with himself. Mrs. Meadlo said she thought her son was right in speaking out.

"He has tried to get it out of his system since he has been back from Vietnam. He was nervous and upset after Vietnam, and has been ever since," she said.

Interview With the Ex-GI

(Continued from Page 1)

yet?" And I told him that I didn't think you wanted us to kill them, that you just wanted us to guard them. He said, "No, I want them dead." So—

Wallace: He told this to all of you, or to you particularly?

Meadlo: Well, I was facin' him. So, but the other three, four, guys heard it and so he stepped back about ten, 15 feet, and he started shooting them, and he told me to start shooting. So I started shooting, I poured about four clips into the group.

Wallace: You fired four clips from your—

Meadlo: M-16.

Wallace: And that's about—how many clips—I mean how many—

Meadlo: I carried 17 rounds to each clip.

Wallace: So you fired something like 67 shots—

Meadlo: Right.

Wallace: And you killed how many? At that time?

Meadlo: Well, I fired them on automatic, so you can't—you just spray the area on them and so you can't know how many you killed 'cause they were going fast. So I might have killed ten or 15 of them.

Wallace: Men, women and children?

Meadlo: Men, women and children.

Wallace: And babies?

Meadlo: And babies.

Wallace: Okay, then what?

Meadlo: So we started to gather them up, more people, and we had about seven or eight people, that we was gonna put into the hootch, and we dropped a hand grenade in there with them.

Wallace: Now you're rounding up more?

Meadlo: We're rounding up more, and we had about seven or eight people. And we was going to throw them in the hootch, and well, we put them in the hootch and then we dropped a hand grenade down there with them, and somebody holed up in the ravine, and told us to bring them over to the ravine, so we took them back out, and led them over to—and by then time, we already had them over there, and they had about 70-75 people all gathered up. So we threw ours in with them and Lt. Calley told me, he said, 'Meadlo, we got another job to do,' and so he walked over to the people, and he started pushing them off and started shooting...

Wallace: Started pushing them off into the ravine?

Meadlo: —off into the ravine. It was a ditch. And so we started pushing them off and we started shooting them, so then altogether we just pushed them all off, and just started using automatics on them. And then—

Wallace: Again—men, women, children?

Meadlo: Men, women and children.

Wallace: And babies?

Meadlo: And babies. And so we started shooting them, and somebody told us to switch off to single shot so that we could save our ammo. So we switched off to single shot, and shot a few more rounds. And after that, I just—we just—the company started gathering up again. We started moving out, and we had a few gooks that was in—as we started moving out, we had gooks in front of us that was taking point, you know.

Wallace: Uh-huh.

Meadlo: —and as we walked—

Wallace: Taking point. You mean out in front? To take any fire that might come.

Meadlo: Right. And so we started walking across that field. And so later on that day. They picked them up, and gooks we had, and I reckon they took them to Chu Lai or some camp that they was questioning them, so I don't know what they done with them. So we set up [indistinct] the rest of the night, and the next morning we started leaving, leaving the perimeter, and I stepped on a land mine next day, next morning.

Wallace: And you came back to the United States.

Meadlo: I came back to the United States, and lost a foot out of it.

Wallace: You feel—

Meadlo: I feel cheated because the VA [Veterans Administration] cut my disability like they did, and they say my stump is well healed, well padded, without tenderness. Well, it's well healed, but it's a long way from being well padded. And without tenderness? It hurts all the time. I got to work eight hours a day up on my foot, and at the end of the day I can't hardly stand it. But I gotta work because I gotta make a living. And the VA don't give me enough money to live on as it is.

Wallace: Veterans Administration.

Meadlo: Right. So—

Wallace: Did you feel any sense of retribution to yourself the day after?

Meadlo: Well, I felt that I was punished for what I'd done, the next morning. Later on in that day, I felt like I was being punished.

Wallace: Why did you do it?

Meadlo: Why did I do it? because I felt like I was ordered to do it, and it seemed like that, at the time I felt like I was doing the right thing, because like I said I lost buddies. I lost a damn good buddy, Bobby Wilson, and it was on my conscience. It was on. So after I done it, I felt good, but later on that day, it was gettin' to me.

Wallace: You're married?

Meadlo: Right.

Wallace: Children.

Meadlo: Two.

Wallace: How old?

Meadlo: The boy is two and a half, and the little girl is a year and a half.

Wallace: Obviously, the question comes to my mind... the father of two little kids like that... how can he shoot babies?

Meadlo: I didn't have the little girl. I just had the little boy at the time.

Wallace: Uh-huh. How do you shoot babies?

Meadlo: I don't know. It's just one of them things.

Wallace: How many people would you imagine were killed that day?

Meadlo: I'd say about 370.

Wallace: How do you arrive at that figure?

Meadlo: Just looking.

Wallace: You saw, you think, that many people, and you yourself were responsible for how many of them?

Meadlo: I couldn't say.

Wallace: 25-50?

Meadlo: I couldn't say... Just too many.

Wallace: And how many men did the actual shooting?

Meadlo: Well, I really couldn't say that, either. There was other... there was another platoon in there and. . but I just couldn't say how many.

Wallace: But these civilians were lined up and shot. They weren't killed by crossfire?

Meadlo: They weren't lined up . . . they just pushed in a ravine or just settin' squattin'... and shot.

Wallace: What did these civilians... these, particularly the women and children, the old men, what did they do? What did they say to you?

Meadlo: They weren't much saying to them. They just being pushed, and they were doing what they was told to do.

Wallace: They weren't begging or saying, 'No... no,' or—

Meadlo: Right. They was begging and saying, 'No, no,' and the mothers was hugging their children and, but they kept right on firing. Well, we kept right on firing. They was waving their arms and beggin'...

Wallace: Was that your most vivid memory of what you saw?

Meadlo: Right.

Wallace: And nothing went through your mind or heart...?

Meadlo: Many a times... many a times...

Wallace: While you were doing it?

Meadlo: Not while I was doing it. I just seemed like it was the natural thing to do at the time. I don't know. It just—I was getting relieved from what I'd seen earlier over there.

Wallace: What do you mean?

Meadlo: Well, I was getting... like the... my buddies getting killed or wounded or—we weren't getting no satisfaction from it, so what it really was, it was just mostly revenge.

Wallace: You call the Vietnamese "Gooks?"

Meadlo: Gooks.

Wallace: Are they people to you? Were they people to you?

Meadlo: Well, they were people. But it was just one of them words that we just picked up over there, you know. Just any word you pick up. That's what you call people, and that's what you been called.

Wallace: Obviously, the thought that goes through my mind—I spent some time over there, and I killed in the second war, and so forth. But the thought that goes through your mind is, we've raised such a dickens about what the Nazis did, or what the Japanese did, but particulaly what the Nazis did in the Second World War, the brutalizations and so forth, you know. It's hard for a good many Americans to understand that young, capable, brave American boys could line up old men, women and children and babies and shoot them down in cold blood. How do you explain that?

Meadlo: I wouldn't know.

Wallace: Did you ever dream about all of this that went on in Pinkville?

Meadlo: Yes, I did . . . and I still dream about it.

Wallace: What kind of dreams?

Meadlo: I see the women and children in my sleep. Some days . . . some nights, I can't even sleep. I just lay there thinking about it.

'Pinkville' Came From Map Color

SAIGON, Nov. 25 (Reuters).—Contrary to popular belief, the word "Pinkville" originated from U.S. Army maps pink-shaded to identify thinly populated areas.

This identification has nothing to do with the political leanings of the population in these areas. In fact, the alleged massacre in My Lai does not fall within any pink-shaded area of Army maps.

American soldiers who have returned to the United States loosely describe the My Lai area as "Pinkville," a word that was given prominence in an American magazine article about the "Pinkville massacre."

Reds Step Up Pressure on Berets' Camp

Barrage Kills GI; Copters Chased Off

SAIGON, Nov. 25 (UPI).—North Vietnamese troops in the foothills around the U.S. Green Beret camp at Bu Prang intensified their shelling of the camp today, killing one American and chasing off helicopters trying to bring in supplies.

New fighting was reported outside both Bu Prang and Duc Lap, its sister outpost along the Cambodian frontier, before the latest 50-round barrage of rockets, mortar rounds and recoilless-rifle shells.

South Vietnamese troops helping to defend Bu Prang, 112 miles northeast of Saigon, killed 20 guerrillas a mile outside the outpost last night but lost six dead and 15 wounded themselves, field reports said.

The two U.S. special forces camps have been under almost constant fire from an estimated 5,000 North Vietnamese who moved into the border area Nov. 1.

The North Vietnamese today saved most of their ammunition for helicopters trying to land at the outpost with supplies. The salvos drove off the helicopters but failed to knock any of them down.

Thirty-five B-52 bombers came in during the night for raids aimed at breaking the guerrillas' hold on the highlands region.

Further south on the Cambodian border, South Vietnamese troops sank or captured 40 guerrilla sampans on a small river, a government spokesman said today.

Two tons of rifle and pistol ammunition were seized in the action which took place last night. The spokesman said 18 guerrillas were killed as they jumped into the water and tried to escape to the banks of the narrow waterway.

Saigon Paper Closed

SAIGON, Nov. 25 (Reuters).—A Saigon daily newspaper, Tien (Progress), has been closed for publishing two articles, one of which offended members of the government, a government spokesman announced. The spokesman said one of the articles, entitled "Letter to Girl Friends," had caused fear and apprehension harmful to national security while the other, called "Upsetting News," had "intentionally offended and humiliated members of the government, thus downgrading the prestige of our national leaders."

ON LIQUID EARTH—Astronauts Richard Gordon (left) and Alan Bean make their first contact wi since leaving Cape Kennedy aboard a rubber raft floating on the Pacific. They are wearing filtering

Apollo-12 Cost $350 Million

CAPE KENNEDY, Nov. 25 (UPI).—The ten-day expedition of Apollo-12 cost American taxpayers $350 million.

The biggest expense was getting Charles Conrad jr., Richard F. Gordon jr. and Alan L. Bean to the moon. That was the job of the giant Saturn-V rocket which cost $185 million. The Apollo-12 command ship Yankee Clipper cost $55 million and the lunar module Intrepid cost $40 million.

The network of supporting forces on earth—the launch operation at Cape Kennedy, the mission control center at Houston and the worldwide tracking and recovery forces—cost $70 million.

Quarantined Astronauts Cruise for H

(Continued from Page 1)

but everybody's just fine," Capt. Conrad said.

"Every one of us is mighty proud of you for that tremendous job you did," Dr. Paine said.

"We were proud to represent Americans on the moon," Capt. Conrad replied.

In Quarantine

All three astronauts looked fit as they peered from the quarantine trailer in which they will stay until returning to the Houston space center. The quarantine will end Dec. 11.

The Hornet will carry the trailer to Honolulu, arriving Friday. The astronauts will then be flown from Hawaii to Houston, arriving Saturday morning to enter the lunar quarantine lab.

Meanwhile, the first container of moon rocks brought back from the Ocean of Storms arrived tonight at Ellington Air Force Base, near the space center.

The schedule calls for both containers to be put in a vacuum chamber at the Lunar Receiving Laboratory (LRL), the first to be opened tomorrow morning and the second tomorrow afternoon.

Taking all precautions against losing the entire load of geologic gems, officials split the valuable cargo into two lots and put them aboard separate aircraft to be flown first to Pago Pago in American Samoa, then non-stop to Ellington.

The containers can float, said John Stonesifer, chief recovery official for the NASA aboard the Hornet, nevertheless, the couriers have instructions to attach liferafts to the containers in case of ditching at sea.

Capt. Conrad, Capt. Gordon and Capt. Bean had a relatively easy schedule today. Medical checkups —including blood tests—and telling highlights of their mission into tape recorders were the only events planned.

The three are untouchables to the outside world until their quarantine period ends Dec. 11. Taking precautions against the remote possibility that they brought back lunar organisms which could harm life on earth, the space heroes are isolated in a quarantine trailer.

The only people with them are Dr. Jernigan and a technician, Brock R. Stone, who l operating in the trai will help unpack ge spaceship when it a LRL.

After arriving at astronauts—trailer an transferred to a cargo flown directly to Ellir they will be trucked i The astronauts, doct nician then move to quarantine quarters building.

Apollo-13 Schedule, Ta Predicated on Apollo-12

By John Noble Wilford

HOUSTON, Nov. 25 (NYT).—Space agency officials hailed Apollo-12 yesterday as a great success, but expressed concern over the astronauts' reported piloting difficulties in making man's second landing on the moon.

Christopher C. Kraft, director of flight operations at the Manned Spacecraft Center here, said that he wanted a full report on the problems before committing Apollo-13 to a landing attempt on the moon's more rugged central highlands.

Apollo-13 is tentatively scheduled for lift-off next March 12, but could be delayed a month to give the crew more training time. Its preferred destination would be the crater Fra Mauro, a rough and ancient area of particular interest to scientists.

But what concerned Mr. Kraft —and is holding up a final decision on Apollo-13—is a statement that Capt. Conrad, Apollo-12 command pilot, made during the space-to-ground news confer "I'll tell you one Conrad said. "It t of knowledge I had baby down there place. That was n Mr. Kraft said th cussion of the landi "the important aspe must be learned dur debriefings. These d to begin Saturday.

—In the last seco descent to the moon, Wednesday morning, craft's rocket stirred dust that interfere astronauts' visibility. rad remarked at the landing was IF flight rules, a pilot's instrument landing.

While this may ha astronaut concern, directors here believe rad was exaggerating In any case, that i want to find out.

2 Senators Denounce Army, CBS in Handling of Song My

WASHINGTON, Nov. 25 (UPI).—Sen. Ernest F. Hollings, D., S.C., denounced the Army today for proceeding with plans to try Lt. William L. Calley jr. for murder in the alleged massacre of South Vietnamese villagers early last year.

The Senate Armed Services Committee meanwhile summoned Army Secretary Stanley Resor to testify in closed session tomorrow on the reported massacre.

The Armed Services Committee made no announcement of its meeting with Secretary Resor, but quietly slipped the meeting into a list of committee hearings distributed to the press gallery.

Another senator, Peter H. Dominick, R., Colo., accused the Columbia Broadcasting System of jeopardizing Lt. Calley's right to a fair trial by carrying an interview with a former member of Lt. Calley's unit who said the lieutenant ordered the shooting of civilians at Song My.

In a Senate speech, Sen. Hollings asked if the Army's decision to try Lt. Calley meant all soldiers who committed a "mistake in judgment" under pressure of combat were "going to be tried as common criminals, as murderers?"

"Are we going to take every helicopter pilot and pilot of a B-52 that hits the wrong target and call him a murderer?" he demanded.

Sen. Dominick denounced CBS for broadcasting an interview with Paul Meadlo, 22, a member of the platoon led by Lt. Calley.

"I have never been so upset over any newscast I have ever seen," Sen. Dominick said, contending that Mr. Meadlo's rights, Lt. Calley's rights and the opportunities for a fair trial had been jeopardized by the interview.

"He said he had personally participated in the murder of some of these men, some of these women and some of these children," the senator said.

"He specifically mentioned the name of the man who is under indictment," Sen. Dominick said with reference to Army charges against Lt. Calley. "What kind of country have we got when this kind of garbage is put around?" He asked.

Sen. Dominick said the interview carried the possibility of creating such an "atmosphere of guilt" that "we may not even be able to get a fair trial."

Sen. Young Urges Probe

WASHINGTON, Nov. 25 (AP).—Sen. Stephen M. Young, D., Ohio, urged yesterday a Senate investigation into the alleged massacre of Vietnamese villagers by American forces.

"Americans must know—and the sooner the better—the long suppressed facts about what certainly has been one of our nation's most ignoble hours," Sen. Young said. "Those responsible must be brought to justice," he told the Senate.

Sen. Young said he asked Sen. John C. Stennis, D., Miss., chairman of the Armed Forces Committee, to order an immediate investigation "of this sordid affair."

Sen. Charles Percy, R., Ill., also called for an investigation.

Thieu's Opposition to Seek Evidence of Alleged Massacre

By Henry Kamm

SAIGON, Nov. 25 (NYT).—Sen. Tran Van Don, an opposition leader and chairman of the Senate Defense Committee, said today that he would send an investigating panel to Quang Ngai Province to gather evidence on the alleged massacre of up to 567 civilians by American troops on March 16, 1968.

But meanwhile, President Nguyen Van Thieu's spokesman reaffirmed that as far as the government was concerned the case was closed. "We have classified it as an act of war," the spokesman said.

He was commenting on the decision of the U.S. Army, following a preliminary investigation, to try 1st Lt. William L. Calley jr., on charges of murdering 109 civilians. S. Sgt. David Mitchell faces a possible court-martial on charges of assault with intent to murder and a number of other present or former soldiers are under investigation.

In a communiqué last Saturday, the Saigon government dismissed the massacre charges as "totally false" and said that the dead in the village of Song My were 125 Viet Cong and 20 civilians killed by aerial bombardment.

The government acted in the face of a number of statements to the press by Vietnamese who said they survived the slayings, and by Americans who said they participated in the action and that the victims died as a result of point-blank small-arms fire by the Americans. Many of the dead were women and children.

Sen. Don, a retired general and former chief of staff and defense minister, said the government statement merely proved that Mr. Thieu was "the valet of the Americans, who are his sole support."

He said he was as reluctant as the government to furnish propaganda assistance to the Communists but said the government should have refrained from saying anything until sufficient evidence was in hand.

For that reason, the senator said he would ask the defense committee at its next meeting, on Thursday, to appoint one or two members to conduct an independent investigation. He said he would accept the mission himself if his other duties permitted.

Sen. Don's hold over the committee is such that approval of his requests is considered certain.

Apollo-12 Families Celebrate Splashdown With Champagne

HOUSTON, Nov. 25 (AP).—With fireworks and champagne, songs and shouts, the families of the Apollo-12 astronauts yesterday celebrated their return from the moon.

"Right now I can't think," smiled Barbara Gordon. "I'm sorry I can't say anything. I'm just kind of numb."

The wife of the Apollo command pilot, Comdr. Richard F. Gordon jr., along with Jane Conrad and Sue Bean, wives of the moon walkers Comdr. Charles Conrad jr. and Lt. Comdr. Alan L. Bean broke out champagne and broke into cheers as television picked up the capsule breaking through the clouds high above the South Pacific.

"Look at that!" cried Mrs. Gordon.

"The sight of the spacecraft on the parachutes was the prettiest sight I've ever seen in my life!" exclaimed Mrs. Bean.

'Fabulous'

"Wonderful . . . fabulous . . . great," said Mrs. Conrad as the spaceship drifted to a spashdown.

At Mrs. Conrad's side during the final phase of the ten-day lunar voyage was Astronaut Neil Armstrong, commander of Apollo-11 and the first man to set foot on the moon.

The Bean home was a scene of jubilation. Clay Bean, 13, climbed atop the house and hurled firecrackers into the yard.

Moonship pilot Alan Bean's other child, Amy, 6, and a companion set off fireworks in the back yard. And inside, Sue Bean joined friends and relatives in a bouncy version of "The Eyes of Texas." The Beans are Texans.

"I'm so very proud," said Mrs. Bean. "Proud to be the wife of an astronaut."

Mrs. Gordon, listening to the astronauts' shipboard telephone conversation with President Nixon, who promoted the all-Navy crew to captains, exclaimed: "Would you believe! He's captain!"

U.S. Rejects Germ War

(Continued from Page 1)

sions, the administration will submit to the Senate, for its advice and consent to ratification, the Geneva protocol of 1925 which prohibits the first use in war of asphyxiating, poisonous or other gases and of bacterial methods of warfare.

"The United States," he said, "has long supported the principles and objectives of this protocol. We take this step toward formal ratification to reinforce our continuing advocacy of international constraints on the use of these weapons."

Soviet UN Initiative

UNITED NATIONS, N.Y., Nov. 25 (AP).—The Soviet Union asked today for early conclusion of an international convention prohibiting the production of chemical and bacteriological weapons.

In a resolution submitted to the main Political Committee of the UN, the Soviet Union and seven other Communist nations also requested that such weapons already in existence be destroyed or used "for peaceful purposes."

The Soviet bloc asked the disarmament conference in Geneva to conduct negotiatons—"a matter of urgency"—to reach agreement on the text of the convention on prohibiting such weapons.

DEATH NOTICE

Mr. Marcel A. PALMARO, a partner of Lehman Brothers, New York, Consul General of Monaco in New York, Permanent Observer of Monaco at the United Nations, and Chairman of the Board of Société des Bains de Mer, died suddenly November 21st, 1969 in New York. A funeral service will be held at Campbell's Funeral Home, at 81st and Madison Avenue, New York, and another funeral service will be held, with burial, in Monaco.

ientists Think Intrepid Hit ravel Sandwich' on Moon

By Victor Cohn

STON, Nov. 25 (WP).— ists here now think that the junked moonship In- struck the moon last Thurs- hit a surface like a "gravel ich" between two layers of making it ring like a bell.

at we have," reported Dr. Latham of Columbia Uni- 's Lamont Geological Ob- ory, "is a first glimmer of tanding of what happened" the Intrepid was fired at ar surface.

s the seismologists believe. id in an interview, is that ntrepid's signal was trapped n two lava layers, thus ing a signal that bounced and forth again and again. lava-gravel-lava sandwich, er words, acted as an echo chamber, propagating this ringing over and over.

The same impact on earth, seismologists say, would have produced a signal lasting no more than a minute. On the moon it did not even reach a peak of intensity for 15 minutes, continuing and gradually dying down, to seismologists' astonishment, for 40 minutes more.

Said Dr. Maurice Ewing of the Lamont observatory: "It was though one had struck a bell in a church belfry a single blow and its reverberation continued for 55 minutes."

Major Discovery

The event also made the seismologists working here agree that, once they achieved understanding, it would mean a major, completely unanticipated discovery about the lunar interior.

Since Thursday they have studied and restudied the tracings received by radio from the superbly sensitive seismometer left on the surface by the Apollo astronauts. They have checked geological observations. They have checked chemical analyses of the Apollo-11 samples of lunar material.

Here is how Dr. Latham now tells the unfolding story:

"The area between the impact and the seismometer is one that had been carefully studied by the geologists. And they had mapped an underlying rubble caused by a huge collision sometime in time.

"Over that rubble is mare-like material—basalt or lava like the material of the Sea of Tranquillity or other maria.

"On top of that is part of the Fra Mauro Formation—debris or ejecta which most people believe was blasted out of the nearby Imbrium Basin. In other words, a loosely consolidated rubble. And on top of that is mare material that can be seen from the surface, again a basalt or lava-like material.

"So you wind up with a rubble that is very low velocity material compared with the lava, a material that can trap seismic energy very efficiently. And the signal will bounce back and forth between those two lava layers."

As the seismologists further pondered, however, they thought of a possible rub. On earth, even in such a sandwich, such a signal would be very quickly damped.

"Here, too," Dr. Latham said, "we think we have a clue.

"On earth all such materials are filled with liquids and gas," gas, petroleum or water trapped in the crevices and cracks of almost all rocks. "On the moon, Apollo-11 sample analyses have shown, there is a nearly complete absence of such fluids and gases. You can hardly measure them.

"We think now that on earth the presence of such materials leads to the damping. And, for the moon, it means that almost any material will just ring like a bell.

"Other hypotheses may emerge. But for now, this one seems best."

ulbright Unit Backs Away rom Hearings on Vietnam

By Tad Szulc

ASHINGTON, Nov. 25 (NYT). e Senate Foreign Relations mittee has again delayed its planned public hearings on Vietnam war—probably until middle of January—amidst in- ions they will be limited to ing resolutions instead of the ised "full review" of the ad- tration's policies.

e decision to shelve a full- ed public airing of the Viet- controversy was taken last y morning at a lengthy clos- ssion of the committee.

only yesterday did it become that the committee had ap- tly backed away from what t have developed into a public confrontation with the Nix- administration.

e main reason for the delay reported to be the feeling of senators that the Nixon ad- tration is moving along an tially correct course toward ie-escalation of the war and time must be given to show 'ast it progresses in that direc-

e two-hour discussion in the ittee last Friday—during two unidentified senators against any hearings at all duced the sentiment among members that Mr. Nixon's on troop withdrawals and Vietnamization" of the war— radual turning over of com- esponsibilities to South Viet- se forces—should be given a e.

it was also stressed by es close to the committee, rous senators believe that the inistration's present stance en- considerable public support hat it would be politically un- for Mr. Nixon's critics to em- on a head-on collision at this ire.

J. William Fulbright, the ittee's chairman, explained rday that Friday's action rep- ted a consensus that it would roper" to hold hearings on nine resolutions on Vietnam e the Senate. He said, however, no date was set for the hear- and no decisions were taken hat witnesses might be called in addition to the resolutions' authors.

Sen. Fulbright said the Senate's workload, chiefly the tax bill and the foreign-aid bill, will prevent senators from participating in any hearings before Christmas, although he did not exclude one or two meetings next month. Other senators and committee sources tended to doubt whether Vietnam hearings would be possible before Jan. 12.

Sharp Contrast

The delay and the seeming scaling down of the hearings' format were in sharp contrast with the committee's earlier plans and Sen. Fulbright's own pledge on Nov. 4—the day after President Nixon's Vietnam policy speech—that they would hold a "full review" of the administration's behavior in the war. He then said that "Americans will recognize the truth when they are exposed to it, and that is the purpose of the hearings."

Sen. Fulbright remarked yesterday that some members of his committee feel that "the country is stirred up" and that emotions in the nation are running strong about a spectrum of problems from Vietnam to such domestic issues as last week's Senate rejection of Judge Clement Haynsworth's nomination to the Supreme Court.

He said it was the responsibility of the senators to "cool down the country," although the committee still holds the parallel responsibility of seeking to "influence" the administration's Vietnam policies.

He remarked that Vice-President Spiro T. Agnew's recent speeches denouncing the critics of Mr. Nixon's policies have inspired a certain "caution" on the part of some senators as to how to proceed in the Vietnam controversy and other fields.

12 New Radio Stations Planned in England

LONDON, Nov. 25 (AP).—The British Broadcasting Corp. is setting up 12 new local radio stations in the next year, Minister of Posts and Telecommunications John Stonehouse announced today.

The stations will be scattered around the country and bring the total in England to 20, Mr. Stonehouse said. They are expected to be in operation by 1971.

More new stations are to follow in Scotland and Wales. All radio stations in Britain are controlled by the BBC and there are no commercials.

United Press International.

BELOW SEE LEVEL—Tearing up the White House swimming pool to make place for expanded press facilities, workmen unearthed two dirt-filled rooms which contained artifacts dating back more than a century. Among these were parts of plates and crockery from the Pierce (1853-57) and Lincoln (1861-65) administrations, apparently tossed out by servants who didn't want to admit breaking them. The White House curator believes more hidden rooms may be found during the excavation work.

Moratorium Bill Put at $2 Million

WASHINGTON, Nov. 25 (Reuters).—Anti-Vietnam war demonstrations here ten days ago cost the government and local business almost $2 million, the Republican leader of the House of Representatives said yesterday.

In a House speech, Gerald Ford of Michigan mentioned damage caused by "the relatively small radical element among the demonstrators."

He said the government, the police department and local business firms reported damage to 503 private buildings and 20 government buildings. In addition, 606 people were injured and 361 arrested.

Almost half the estimated costs came from transporting several thousand federal troops into the area. Other costs included police overtime pay and $240,000 damage.

Senate Rejects Tax Break, Except for Mining Interests

WASHINGTON, Nov. 25 (AP).—The Senate voted today to continue the income-tax surcharge at a 5 percent rate through June, 1970.

It defeated 49-28 an amendment offered by Sen. Harry F. Byrd jr., D., Va., to strip from the tax-reform bill a provision that would continue the levy for that time.

The outcome was a significant victory for President Nixon in the early voting on disputed issues in the big bill.

Mr. Nixon had said the extension was necessary to provide badly needed revenue for the remainder of the current fiscal year and thus contribute to the budget surplus he is planning as part of the fight against inflation.

Tax Break Rejected

WASHINGTON, Nov. 25 (WP).—Moving with surprising speed on the first day's debate of the tax reform bill, the Senate crushed attempts yesterday to double the $600 personal exemption and to remove newly created preferences for oil and mining interests.

Sen. John J. Williams, R., Del., a foe of special breaks for the oil and mining industries and ranking Republican on the Senate Finance Committee, was rebuffed on his amendment to delete a $10 million concession to oil producers with less than $3 million annual revenue. The vote was 34 to 26.

Under present law, all producers may deduct an amount equal to 27 1/2 percent of total revenue from net income before computing taxes, but no more than 50 percent of that net income. The Finance Committee bill cuts that depletion allowance to 23 percent but permits the smaller producers to deduct up to 65 percent of net income.

Sen. Williams argued that there is no justification for widening an existing loophole and said that operators with income up to $3 million are really not little people.

Chairman Russell B. Long, D., La., of the Finance Committee, floor manager of the bill, said the new ceiling is justified in that most smaller producers are not able to take the full 27 1/2 percent or even 23 percent depletion because of lower profit margins. The provision would help less efficient wells, he said.

Indian Invaders of Alcatraz Reject Appeal for a Pullout

SAN FRANCISCO, Nov. 25 (Reuters).—An Indian invasion force today rejected an appeal from Interior Secretary Walter Hickel to retreat from Alcatraz Island, the abandoned prison fortress in the middle of San Francisco Bay which they seized six days ago.

Through Indians on the mainland, the 100-strong invasion party issued a statement making clear it is interested only in negotiating on its own terms.

Militant warriors from 20 tribes across the United States seized the island at dawn last Thursday and proclaimed it Indian property, saying they wanted Alcatraz as symbolic reparation for all the land the white man stole from them.

In a message from Washington yesterday, Mr. Hickel said he would hold talks with the Indians as long as they did not set conditions—notably their request that ownership of the island be transferred to them from the government within two weeks.

"I am available at any time to meet with their representatives to discuss their views on what should be done with the property, but without any conditions in advance of those discussions," he said.

Back came the terse reply from the Indians: "The preconditions still stand."

The government has made no attempt to dislodge them by force but has told them to leave and has intermittently called on the Coast Guard to blockade the misty 12-acre rock. At present, food and medical supplies for the invaders are being allowed to land.

Other negotiating conditions set by the Indians include a request that the government provide funds for setting up an Indian cultural center on Alcatraz and that Mr. Hickel come to the barren rock in person.

They also called on the 70 or so Indian tribes throughout the United States to say what was wrong with their reservations so that the specific grievances of the entire Indian people could be made known.

Richard Oakes, a 27-year-old Mohawk, said the occupation of Alcatraz is the first step in a campaign to "reclaim" Indian lands from the white man. He said Alaska is next.

42 Airlines Agree on Cuts In Atlantic Excursion Fares

CARACAS, Venezuela, Nov. 25 (Reuters).—The world's 42 major airlines, affiliated to the International Air Transport Association, today agreed in principle to a package deal reducing North Atlantic excursion fares.

The association's under secretary-general, Don Reynolds, said the package deal reduced excursion fares "by a fair amount" and would eventually cut down the mid-Atlantic fares as well.

North America-Europe

The new fares, involving excursions from 14 to 45 days, were expected to become effective April 1 at the latest, Mr. Reynolds said. The deal would benefit travelers from North America to Europe and vice versa.

The new rates, however, would only favor individual or group travel on excursions ranging from 14 to 45 days.

Rates for mid-Atlantic travel—between Latin America and Europe—were also expected to be reduced as part of the deal, Mr. Reynolds said.

Mr. Reynolds said that airlines—here to put a stop to their uncontrolled price-cutting war—had accepted in principle the following points:

- To extend the validity of the 14 to 21-day excursion to 28 with no change in price.
- That a limited number of stop-overs—tentatively five—would be allowed in the 14 to 28-day excursion.

The stop-over restriction was introduced in view of the economics involved, mainly to avoid passengers switching to too many carriers on a single trip, an IATA official explained.

France and U.S. To Expand Joint Science Program

WASHINGTON, Nov. 25 (UPI).—France and America today pledged further extension of their cooperation in the scientific and technical fields as French cabinet minister François X. Ortoli concluded his visit to Washington.

Mr. Ortoli, minister for industrial and scientific development, was here at the invitation of Dr. Lee A. DuBridge, science adviser to President Nixon.

A joint statement said the two "expressed their satisfaction with the progress which has occurred in the short time since they last met [in Paris last September], and reaffirmed their support for an expanded program of scientific and technical cooperation."

They also announced the appointment of several well-known scientists and administrators "to provide high-level coordination of the cooperative program."

2d Spanish Quint Dies But Survivors Thrive

BARCELONA, Nov. 25 (AP).—One of the four surviving quintuplets born in Tarrasa last Friday died at Francisco Franco Hospital here today, doctors reported.

The boy, who weighed two and a half pounds, succumbed after a massive pulmonary hemorrhage.

The smallest of the quints, also a boy, died Sunday.

The survivors, a girl and two boys, are gaining weight and are in satisfactory condition, doctors said today, and their mother, Isabel Hernandez Nella, 38, wife of a metal worker, is in good condition.

Ulster-Springbok Rugby Match Is Off

BELFAST, Northern Ireland, Nov. 25 (UPI).—The rugby match between the South African Springboks and Ulster scheduled for Saturday at Belfast was called off today.

It is understood the Security Council—which comprises army and police chiefs and members of the Northern Ireland cabinet—feared anti-apartheid demonstrations might shatter the uneasy peace in Belfast, scene of bitter rioting last summer.

Lower Voting Age Asked

Violence Commission Urges Draft Reforms

WASHINGTON, Nov. 25 (UPI).—The National Violence Commission called today for draft reforms and a lowering of the minimum voting age to 18 as steps to woo alienated youth back into the mainstream of American society.

The commission, headed by Dr. Milton Eisenhower, also suggested easing criminal penalties for use or simple possession of marijuana and for new studies to determine the physical and psychological effects of smoking "pot."

The panel praised Congress for approving President Nixon's Selective Service lottery, which would have the effect of limiting the draft to 19-year-olds starting in 1971. But it called on lawmakers to pass next year the remainder of the President's draft-reform package.

Dr. Eisenhower told a news conference that many youths turn to violence out of a sense of frustration because they are not permitted to participate directly in the nation's political process. He said giving them the right to vote would help.

The brother of the late President Dwight D. Eisenhower said 75 to 80 percent of the nation's young are opposed to the war in Vietnam but "only a very small minority have refused to serve."

'Common Sense'

"There is a lot of good common sense in the statement that those who are old enough to carry out the foreign policy of this country by offering their lives in war are also old enough to decide (through voting) if they are to have a war," Dr. Eisenhower said.

"The youth of today have not been called on by their elders to defend these values by service in causes which young and old alike believe to be urgent and important, such as the war against the Axis powers or the struggle to end the depression of the '30s," the commission said in a 12-page report.

"Instead, they face the prospect of having to fight in a war most of them believe is unjustified, or futile, or both."

The commission noted that the crime rate for urban violence is two or three times higher among youths between ages 15 and 24 than among older persons.

It said that youth forms the cutting edge of sometimes violent social protest and observed that such violence could be explained in part as misplaced idealism or as a result of slum deprivation.

But it said, "We cannot accept violent attacks on some of our most valuable institutions, or upon the lives of our citizens, simply because some among the attackers may be either idealistically motivated or greatly disadvantaged."

Retirement of Lippmann, Krock, '2 of Johnson's Major Achievements'

NEW YORK, Nov. 25 (Reuters).—Mrs. Liz Carpenter, former press secretary to Lady Bird Johnson, says she felt that President Lyndon B. Johnson considered the retirement of columnists Arthur Krock and Walter Lippmann as "two of his major achievements."

In her memoirs in the current issue of McCall's magazine, Mrs. Carpenter said the former President's "trouble with the press" stemmed from a "numbers" problem.

"There is only one President, and there are 930 reporters accredited to the White House. Well, actually 928. While we were there Arthur Krock (Washington columnist for The New York Times) retired and Walter Lippmann left town. I always suspected the President felt these were two of his major achievements."

Mrs. Carpenter, a veteran Washington reporter, revealed that although Mrs. Johnson studied journalism in college, "she seldom read her own press."

"The President and I read every line," she said, recalling that following White House press conferences, President Johnson would be at his teletype machines "before the reporters were out the door."

"If the stories didn't clock out fast enough, he would lift up the glass lid, reach down and pull out the copy. I was terrified he would get his arm caught in the machinery."

Student Homosexual Group Recognized by Minnesota U.

By Austin Wehrwein

MINNEAPOLIS, Nov. 25 (WP).—The University of Minnesota has recognized as a legitimate student organization a group called "Fight Repression of Erotic Expression" (FREE).

The members are 75 homosexuals, and their motto is, "Gay Is Good."

"Recognition," which is in the hands of a joint faculty-student committee of the university senate on the 43,000-student campus, does not mean "approval." It is a routine listing that gives an organization such rights as free use of university meeting rooms.

Recognition was given without controversy, and university officials reported no objections from the citizenry at large.

However, questions arose at a meeting of the Republican-controlled Board of Regents last weekend. The board told the university administration to "study" the whole recognition system and report back.

Regents chairman Lester Milkerson, a car dealer, said it was a "consensus of all the regents" that the recognition system needed review.

Recognized groups need an adviser and FREE's is Koreen Phelps, a tall, blonde, 20-year-old former student. Miss Phelps said FREE was needed because there was no organization for homosexuals here. She estimated the ratio on the campus is the same as in the population as a whole, or about 10 percent.

'We Should be Free'

"We want to educate people. Gay is good, and we should be free to enjoy the rights of straight society," Miss Phelps said. "We encourage our members to tell their parents not to lash out at them but to help parents understand them."

She said that student deviates would find it easier to disclose homosexuality to parents with a group behind them. If parents really love their children they will accept them as they are, she added.

FREE already has staged one dance in the student union, and plans a weekly "Gay Tuesday" and a Christmas party.

At its first dance, attended by 60 men and women, members talked freely to a newsman. Nick Lenarz, a sophomore who was dancing with another man, said: "I feel just like a straight person who had never danced before. I've been to school dances and things, but now I'm really dancing for the first time."

His partner, Tim Peterson, a senior, said, "We learned to accept each other as people, not as queers, or faggots, or whatever else people call us."

Ray Wants To Move From Security Cell

NASHVILLE, Tenn., Nov. 25 (UPI).—James Earl Ray, convicted killer of the Rev. Martin Luther King jr., yesterday petitioned federal court to order his removal from the maximum security building at the state penitentiary here.

The petition, received in the mail yesterday afternoon, named State Corrections Commissioner Lake F. Russell and prison Warden W.S. Neil as defendants.

It claimed Ray's confinement to a small maximum security cell for the past eight months constitutes "cruel and inhuman treatment."

The petition seeks both preliminary and permanent injunctions barring prison officials "from further unlawful incarceration" of Ray but does not state specifically where in the prison system Ray wants to live.

Mr. Russell said the state "probably" will oppose the petition. Mr. Russell's predecessor, Harry Avery, claimed to know of a plot to kill Ray in prison but has refused to give any details of the "plot."

French Professor Charged by Chile

SANTIAGO, Chile, Nov. 25 (UPI).—The government has filed criminal charges of harboring a fugitive against a French philosophy professor held in connection with a bank robbery perpetrated by leftist guerrillas.

Louis Fabre, 42, is here as an exchange professor. He was cleared of the possible charge of complicity in the bank holdup.

A special judge threw out a defense contention that Mr. Fabre was entitled to the same immunity as United Nations functionaries. Defense counsel said the immunity denial would be appealed to the Supreme Court.

Wallace Pays a Visit To S. Korean President

SEOUL, Nov. 25 (AP).—Former Alabama Gov. George C. Wallace paid a courtesy call on South Korean President Chung Hee Park today.

Mr. Wallace arrived in Seoul from Vietnam Sunday on a four-day visit as part of his Asian fact-finding tour. Mr. Wallace also met with Foreign Minister Choi Kyu-Hah.

Christmas vacation before your Christmas vacation. On the S/S France.

This year, the France leaves Le Havre and Southampton for New-York on the 12th of December (half round-trip fare from $239).

Five days in a deck-chair. Or in a swimming pool. Or bridge. Or movies. Nothing to do, or lots to do. It's a great way to sneak up on Christmas looking at the sea.

On the France the Faubourg St Honoré is at your cabin door.

You can start your Christmas purchases in the middle of the Atlantic. Or you can even learn the recipe for "Coupe givree Bibesco" for your Christmas party.

Five restful days to get to New-York. And then you'll have five more days before you get home. Enough time to buy the tree and the American gifts you miss.

Go and see your travel agent to day. Or call us. Or write us.

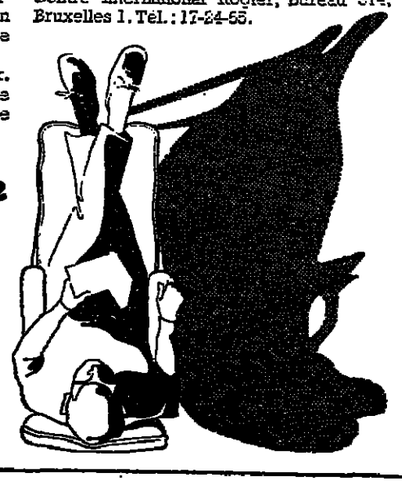

Compagnie Générale Transatlantique: 6, rue Auber, Paris 8e. Tél.: 742-97-59.

French Line: 20 Cockspur Street, London S.W.1. Tél.: 839-90-40.

French Line: Steinhof 11, 2 Hamburg 11. Tél.: 36-47-38.

Compagnie Générale Transatlantique: Centre International Rogier, Bureau 314, Bruxelles 1. Tél.: 17-24-55.

French Line

One airline has new low fares and direct flights to New York from twice as many European cities than anyone else.

Guess which one.

Round Trip from:

Shannon	$192	Brussels	$270	Oslo	$280
Santa Maria	207	Amsterdam	270	Copenhagen	280
Lisbon	240	Frankfurt	280	Nice	280
London	260	Munich	280	Berlin	285
Glasgow	260	Hamburg	280	Prague	290
Barcelona	265	Düsseldorf/Cologne	280	Helsinki	290
Paris	270	Stuttgart	280	Vienna	295

And we can arrange connections for you from the following cities:

Dublin	$204	Geneva	$280	Lyons	$280
Madrid	250	Zurich	280	Warsaw	345
Milan	280	Marseilles	280	Athens	359

We don't like to sound braggy, but it's hard to talk about having no-change-of-plane service to New York from twice as many European cities without doing just that.

And, while we're at it, take a look at our new 23-or-more-day Jet Economy fares. Good for trips ending May 15th. (All fares good right now, except Shannon and Dublin which start December 10th.)

(But just in case you can't spare the time, remember our 14-21 day Economy Excursion Fares are still very much in effect.)

There are no groups to join, no tours to take, nothing but the lowest individual Jet fares you'll find on any scheduled airline. Anywhere.

For all the details and all the travel help you'll ever need, see your Pan Am® Travel Agent. Or call Pan Am direct. And ask for guess who. **Pan Am makes the going great.**
World's most experienced airline.

ginning of the End

rael Announces Capture f a Key Galilee Terrorist

By James Feron

USALEM, Nov. 25 (NYT).— security authorities an- ed today the capture of a r Jordanian Army intel- e officer said to be the key in the largest network of ist cells operating in Israel the 1967 war.

y arrested him Sunday in village south of Jenin, in occupied West Bank, and tified him tonight as Capt. Latif Rsheid.

is said to be related to the of Prince Mohammed, a er brother of King Hussein rdan.

eli officials said they were Capt. Rsheid by the dying of an Israeli Arab who was a er of one of his underground

The Arab died Saturday when his car, loaded with sives, blew up accidentally entering the Israeli town of

capture represented the important security arrest by Israelis since the end of the war. One Israeli officer said: means the beginning of the for these cells. It all starts veling now."

e captain, a tall, ruddy, self- ed man in his mid-thirties, led between Amman, Jordan's al, and Majd el-Krum, an li village, disguised as a fellah farmer). He had brothers th places.

m Sir, which is between these points, he built independent age cells in Israel's Galilee, lished training sites near and supplied his recruits explosives and ammunition.

ting casually in Israeli police quarters in occupied Jenin, Rsheid spoke with as- nce this morning between cups offee and the good quality ettes he demanded.

o one ever checked me," he as he spoke of the hundreds us trips he made between the Bank and Israel. An eli security officer said the ain traveled to Acre almost y day.

ie carried a little plastic bag his pitta (flat Arab bread), atoes and cucumber—and a few sticks of dynamite," the officer said.

The beginning of the end for the Arab Legion officer came Thursday when security officers broke a terrorist ring in Acre. One arrest led to another and Saturday two Israeli Arabs from Majd el-Krum, the site of another ring, blew themselves up as they drove into Acre.

One Arab was killed immediately. The other was reported at the time to have died before he could be questioned. Apparently, he was able to identify Capt. Rsheid and his headquarters before dying.

Capt. Rsheid had praise for his Israeli captors. "Listen. I built networks that were supposed to operate for a year," he said, "but some were discovered within a week. I take my hat off. Maybe I should work for you."

Turnabout

Before the 1967 war, Capt. Rsheid worked for Jordanian intelligence tracking down Arab guerrillas operating against both King Hussein of Jordan and the Israelis. After the war, when these guerrillas sought him out for revenge, Capt. Rsheid proposed instead that he work for them. The guerrillas accepted this suggestion.

He reportedly established the Acre cell whose members have been charged with more than a dozen major acts of sabotage, including the sabotage of the Haifa refinery pipeline and the dynamiting of five apartment houses in Haifa.

He established cells in Madj el-Krum, Shaad and other Galilee towns. Just this morning, the Israelis arrested four West Bank Arabs in Dir Abu Daif and charged them with the sabotage of a reservoir at Tannuch, a town northwest of Jenin.

At least seven persons were killed and scores of others injured in the bombings ascribed by Israeli authorities to these groups.

Capt. Rsheid lived in Sir with his mother, who was instructed to get rid of the weapons, ammunition and explosives if he was ever captured.

"There's no friend like a mother," he said confidently as he answered the questions of an Arabic-speaking Israeli reporter.

After he was picked up at home, his mother went to an orange grove several hundred yards from the house and buried the explosives and other materials in a circular watering ditch. Then she watered the entire orchard.

When Capt. Rsheid returned with his Israeli captors, he reportedly asked her: "Where did you hide the stuff?"

"Are you crazy?" she screamed at him.

"Mother, they know more than you ever dreamed," he said. Finally convinced, she led her son and the Israelis to the buried cache. There they found 180 slabs of explosives weighing 90 pounds in all, ten Kalachnikov assault rifles and ammunition.

The Israelis said Capt. Rsheid did not have a radio and presumably received whatever instructions he needed during his trips to Amman. They surmised that he might have obtained his matériel through the Arava, or desert border area south of the Dead Sea.

Capt. Rsheid did not trust anyone, the Israelis said, so he carried messages and distributed weapons and the explosives himself.

Israeli authorities said they have never had any trouble with the inhabitants of Sir. Although the village is only seven miles south of Jenin, it requires a 30-mile journey over a road through the hills to reach it.

In another development, Israeli authorities declared yesterday after a fierce gun battle in Jenin that no restrictions would be imposed on the occupied town because townspeople had not assisted suspected Arab terrorists.

The announcement was made by Defense Minister Moshe Dayan, who visited the area after a brief but costly encounter led to the deaths of an Israeli border policeman and two Arab suspects.

gypt Reported o Accept Visit y U.S. Diplomat

AIRO, Nov. 25 (NYT).—Hopes new diplomatic initiatives in deadlocked Arab-Israeli con- t were brightened here today by orts that Egypt had agreed to isit by Joseph J. Sisco, U.S. as- tant secretary of State for Near stern and South Asian Affairs. Mr. Sisco has been involved in orts to formulate a package plan a solution of the conflict. He s reported to have broached the sibility of visiting Cairo and er Middle East capitals after pt earlier this month rejected latest U.S. proposals for a lement with Israel.

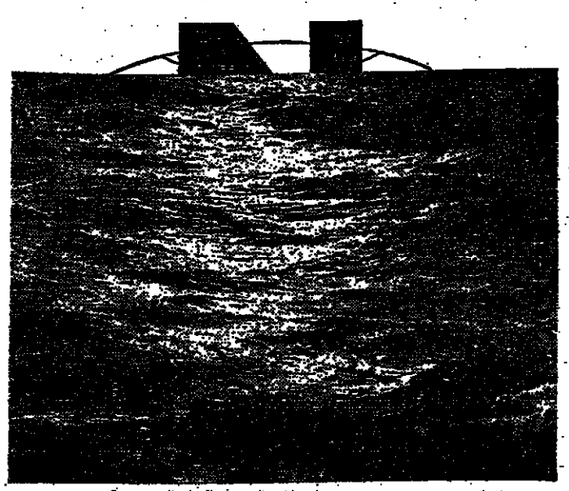

is understood that a date for visit has not yet been fixed, it is assumed that Mr. Sisco attempt to arrive in Cairo re Dec. 20, when Arab leaders scheduled to open a summit ference in Morocco to coordi- e strategy against Israel.

Mr. Sisco goes through with visit to Cairo, he will be the est U.S. official to come he e Cairo broke diplomatic re- ns with Washington after its with Israel in June, 1967.

rench Journalist ies After Accident

IN CALMER SEAS—The oil rig Constellation which capsized and sank in the stormy North Sea yesterday.

Helicopters Rescue 67 Men From 2 Oil Rigs in North Sea

LONDON, Nov. 25 (UPI).—Helicopters today rescued 27 men from an oil-drilling rig that capsized and sank in a North Sea gale and evacuated 40 others from another rig threatened by the storm, coast guard spokesmen said.

Helicopter pilots flew through snow and 50-mile-an-hour winds in today's predawn darkness to rescue the 27 from the rig Constellation. The rig was under tow to Rotterdam when it overturned 95 miles off Flamborough Head, the spokesmen said.

Later this morning the pilots went out again to take 40 of a crew of 61 off the rig North Star, standing 120 miles northeast of Great Yarmouth, which is threatened by high seas and winds, the spokesmen reported.

A spokesman for International Drilling Co., owners of the Constellation, said the platform was put under tow 90 miles off Great Yarmouth. Five tugs pulled it for 36 hours through high seas until it finally capsized in 30-foot waves, he said.

The men from the Constellation were flown to another oil derrick, the Britannia, and the crew of the North Star to the Orion, both currently out of the storm's area, the coast guard spokesmen said.

The spokesman for the owners of the sunken rig said all the men were rescued before it capsized.

Coast guard officials said the capsized rig stayed afloat until late this morning, when it sank.

Bertrand Russell Plans Tribunal Of Possible Czech Show Trials

LONDON, Nov. 25 (AP).—Bertrand Russell, the 97-year-old philosopher who sponsored a "tribunal" that investigated alleged American war crimes in Vietnam, announced plans today for a similar investigation of possible political show trials in Czechoslovakia.

Lord Russell expressed alarm in a letter to The Times over reports that show trials may take place in Prague.

"It is imperative to defend the lives of those whose crime was the Czechoslovak 'spring' of 1968," he said. "If trials are to be staged, the offered evidence must be subjected to the most exhaustive scrutiny, and this task must not be left to the cold warriors."

Speaking on behalf of his Peace Foundation, Lord Russell appealed to all those who "have carried out independent investigations into the character of the war in Vietnam" to prepare for similar hearings on Czechoslovakia.

Christopher Farley, director of the Russell foundation, later said that evidence would be given by persons not involved in the East-West ideological dispute.

"They will be persons who have no record of anti-Communism and whom the Russians will not be able to dismiss as anti-Communist propagandists," he said.

Czech Labor Code to Attack Cheating, Loafing, Parasitism

By Paul Hofmann

VIENNA, Nov. 25 (NYT).—The Czechoslovak regime disclosed today details of proposed new legislation against "cheating, loafing and parasitism."

The Communist party press announced that the existing labor code would be amended to permit dismissal without notice of workers "who systematically violate labor discipline or whose job performance is inadequate."

Other new legal provisions will call for "fast and particularly effective punishment" of persons found guilty of negligence, parasitism, racketeering and corruption.

[Thirteen top labor leaders resigned or were fired today from posts on the Central Trade Union Council, United Press International said quoting a CTK report. CTK said the purge of officials, most of whom are liberals, came during the first session of a two-day plenary meeting in Prague of the council.

[One man, the staunchly liberal Vlastimal Pisar, was banished both from the council presidium and the council itself. Another reformer, Bedrich Karbus, was "allowed" to resign the same two posts. Three other men also resigned from the presidium, five others were fired from the whole council and three resigned from the full body.

[Karel Polacek, the council's chairman, echoed the current Communist line in a speech today when he spoke of "rightists" who influenced union policies during the reform period last year.]

Czechoslovak newspapers coupled their reports on the new draft bills with denunciations of poor working morale and widespread black-marketeering.

The press reports made no mention of the opposition to the Soviet occupation and its domestic hard-line backers as possible causes of the present slackness in factories and on farms.

However, a daily newspaper for Slovak farmers, Rolnicke Noviny, remarked that "when there will be enough goods of satisfactory quality, there will be no reason for racketeering."

Last night a stern warning was issued to speculators and listless workers by the Community party presidium.

The presidium announced that the new legislation would include "principles to strengthen the centralized management of foreign trade." This was understood to mean stringent curbs on hitherto semi-autonomous export-import agencies that are allegedly plagued by corruption and are a fertile ground for illegal foreign currency deals.

Some large state-owned industrial combines, like the huge Skoda works, seem likely to lose the privilege of transacting their export business without much interference from the central state authorities.

Waldeck Rochet Has Operation

PARIS, Nov. 25.—French Communist party leader Waldeck Rochet, 64, was operated on today for an infected prostate, his second operation this year. He spent several weeks convalescing this spring in Moscow following a kidney operation.

The state of Mr. Rochet's health and his consequently diminished role in the party's activities have led lately to speculation that he would be replaced as secretary-general during the French party's congress early next year.

The men most often cited as successors are Georges Marchais, the Moscow-oriented front runner, followed by Roland Leroy and Etienne Fajon. Georges Séguy, the head of the General Labor Confederation (CGT), is considered a dark-horse candidate.

After 7 Months

New Coalition Government Formed by Beirut Premier

By Dana Adams Schmidt

BEIRUT, Nov. 25 (NYT)—Rashid Karami succeeded tonight in forming a new Lebanese government, seven months to the day after pro-commando riots brought about his resignation as premier.

Mr. Karami announced a 16-man government of national coalition, entirely composed of members of parliament. It included all parliamentary groupings with the exception of the Christian rightist National Bloc of Raymond Edde, who had previously announced that he would not cooperate with Mr. Karamai, whom he blames for Lebanon's crisis and its continuance. He maintains that Mr. Karami should never have resigned and should on the contrary have taken a tough line in suppressing the Palestinian commandos and other leftist supporters.

Although this government could win an overwhelming majority if it is ever presented to parliament, it was not certain that it would prove viable. The fact that Mr. Edde refused to participate makes it uncertain whether the other two members of what is known as the Tripartite Alliance of Christian Parties, Maurice Gemayel, head of the Christian Falange, and Camille Chamoun, the former president, who heads the National Liberal party, would feel that they could take part.

Mr. Chamoun's party would be represented by Habib Mutran as minister of health in the cabinet as announced.

During earlier efforts to put together a cabinet, Mr. Gemayel and Mr. Edde refused to participate in defense of Mr. Chamoun's right to a cabinet seat, and it is possible that Mr. Gemayel and Mr. Chamoun will now demonstrate solidarity with Mr. Edde.

If the new cabinet weathers this test, its next most important task will be to supervise talks with the commandos to work out details of the Nov. 3 Cairo agreement and their implementation.

Kamal Jumblatt, the head of the Progressive Socialist party and a champion of the commandos, is to become minister of the interior, in which capacity he would be responsible for reintrodncing the gendarmerie into the 15 refugee camps, which house about 85,000 Palestinians.

The new government includes the two main rightist and leftist leaders, namely Mr. Gemayel and Mr. Jumblatt, both of whom endorsed the Cairo agreement which ended the 13-day war between commandos and the Lebanese Army.

Mr. Karami, 48, becomes both premier and minister of finance. A deputy from Tripoli, he has been a member of parliament since 1953 and has served repeatedly as premier. Standing somewhat left of center, he is considered the most vigorous and talented of the Moslem leaders.

13 Die in Caribbean After Drinking Fuel

KINGSTOWN, St. Vincent, Nov. 25 (Reuters).—Thirteen people, including one woman and five children, have died and 41 are in a hospital after drinking aviation fuel and methylated spirits which they mistook for strong local rum called "Jack Iron."

The liquids were washed up here in drums from a wrecked schooner.

The victims are all from the northern part of this Caribbean island, police said.

El Al Guard Back For Swiss Trial In Arab's Death

GENEVA, Nov. 25 (NYT).—Mordechai Rachamin, 23-year-old Israeli security guard, returned to Zurich from Tel Aviv today to face trial in the killing of one of the four Arabs who attacked an El Al plane last February at Zurich airport.

Upon his arrival, Mr. Rachamin was flown by helicopter to an undisclosed location pending the opening of the trial in Winterthur, near Zurich, Thursday.

The Israeli, who was released on bail last March, faces a charge of homicide with extenuating circumstances for allegedly killing one of the Arabs after he had surrendered and been disarmed. If convicted he could be sentenced to from one to ten years.

The three surviving Arabs, two men and a woman, are accused of murdering the El Al co-pilot, who died of his wounds several weeks after the attack. If convicted, they could receive a maximum sentence of life imprisonment.

The canton of Zurich court rejected last week a plea by Mr. Rachamin's counsel that he be tried separately.

Hess Examination Starts; Condition Called Not Critical

WEST BERLIN, Nov. 25 (Reuters).—Doctors today began a five-day medical examination of Hitler's former deputy, Rudolf Hess, 75, who was taken to the British military hospital yesterday after complaining of stomach pains.

A British military government spokesman said Hess spent a quiet night, his first outside Berlin's Spandau Jail since 1946.

Informed sources here said that Hess was not in a critical condition, but that he had complained of stomach pains for several weeks, particularly in the last few days.

They said doctors decided to take him to the hospital for a thorough examination which they could not have carried out at Spandau.

Hess's Freedom Sought

MUNICH, Nov. 25 (AP).—Hess's attorney, citing the prisoner's poor health, has renewed efforts to gain his release from prison.

Dr. Alfred Seidl said today he wrote letters to West German Chancellor Willy Brandt and Federal President Gustav Heinemann and that both had given their assurances that they would attempt to have Hess freed.

Contrast in the Pacific

When, with pinpoint accuracy, Apollo-12 sped through scattered clouds into the white-capped Pacific, its astronauts were adding another stanza to the saga of a great sea. Last of the horizons of Western man, the Pacific has marched, for good or ill, into the forefront of history.

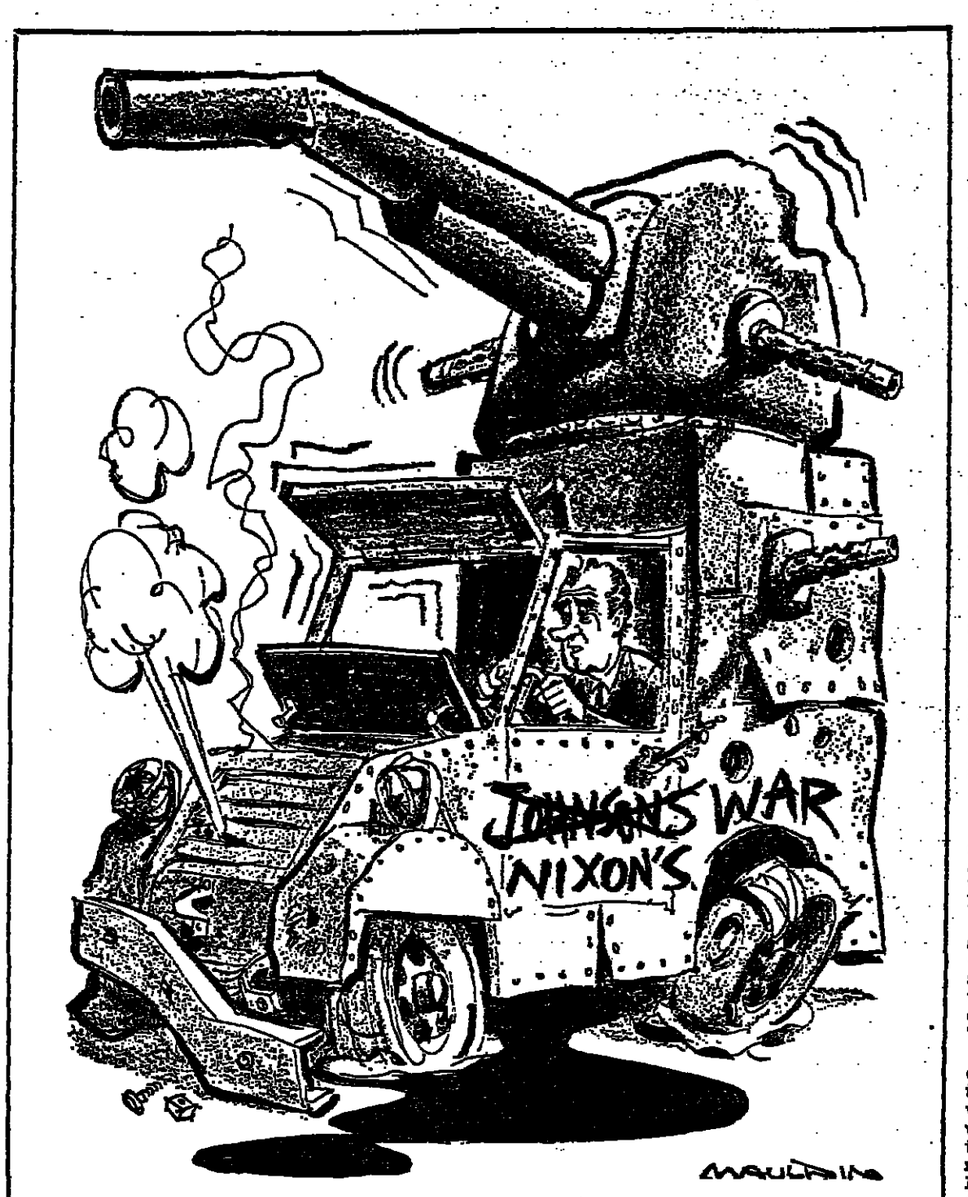

One wonders what the little Polynesians of Samoa, bringing racial memories of the playful demigod, Maui, to the television screens of their village schools, thought of the feat. Maui could dredge up islands while fishing, or slow the sun's course to help the crops. Maui's people sailed their great double-hulled canoes toward the rising sun, across vast expanses of empty ocean to those corrugated mountains or shredded atolls that have given Europeans a glimpse of prehistory in a paradisiacal setting. And now moon rocks are routinely shuttled from the moon-craft to Pago Pago for the world's laboratories, and great jets speed to airfields on Tutuila, Tahiti and Oahu, compact with technological wonders.

The second manned expedition to the moon's surface—less than six months after the first—was an almost frightening example of how swiftly modern man can consolidate his exploratory gains. From that moment when Balboa, "silent upon a peak in Darien," first glimpsed the Pacific, the process of charting the sea was marked in centuries. Magellan, Drake, Anson—their ventures came many years apart and were star-crossed by death and hardship. Even after Cook, even after the Manila galleons had trudged in secretive loneliness for decades from the Philippines to Acapulco and back again, the Pacific was a sea of mystery and charm, that entranced Melville, and Stevenson, and London.

Indeed, although there is no mystery about the navigation of the Pacific now, and it is gridded with air and ship lanes, the Western world has still not resolved its relationship to the peoples of the oceanic expanse. Computers can program a flight to the moon, but they cannot give a humane answer to the problem of how a Fijian, a Samoan, a Micronesian, is to come to terms with the computer and all it represents.

In fact, Western man has himself not yet learned to live with his own technology; he has lost the superb self-confidence that once sent missionaries and traders to the South Seas to bring civilization to benighted heathens. He may teach little Samoans with television to know the wonders that exist outside the compact villages, with their hereditary chiefs and their ancient way of life—but looking back at teeming cities, at crowding problems, he cannot really believe that what he brings is the ultimate good.

There was a time when exploration drove man out of himself, to see new wonders and to break old ways. Today, such a feat as that of Apollo-12 can only drive him back into self-questioning. The wonders are still there—but man brings his problems to them, and cannot jettison them, even in the Sea of Storms.

'Good Heavens! It's a Used Car and I Bought It!'

Britain and Europe

A fundamental change in France's attitude toward British entry into the Common Market is responsible for the moderate optimism in Brussels and Bonn about next week's six-power summit meeting to discuss the issue.

Extraordinarily difficult economic problems remain to be overcome before negotiations with Britain can open, problems of farm subsidies and surpluses above all. But the political obstacles interposed for almost seven years by Gen. de Gaulle have now been withdrawn by his successor, President Pompidou. Ministerial meetings in Brussels preparatory to the summit conference evidently have convinced all France's partners of this, even the skeptical Dutch.

Gen. de Gaulle gave many reasons to explain his veto of negotiations with Britain. But his chief objection undoubtedly was that London would be a rival for European leadership. He preferred a six-nation continental community because it was small enough to be dominated by France and big enough to dominate Europe.

Mr. Pompidou has no pretensions to French dominance. Moreover, weakness of the franc and the loss of the bulk of France's gold reserves limit Paris's ability to disregard the views of its allies, whose monetary cooperation it needs. At home, Mr. Pompidou faces a strong current favoring the political unity of Western Europe, which would include Britain, reflected in recent public opinion polls and in a report of the Foreign Affairs Commission of the National Assembly. He is also under pressure from centrists in his government who want Britain in the Common Market.

Mr. Pompidou's own view is that France stands to benefit politically from Britain's entry into Europe. It is not in France's interest, he believes, to have a hostile Britain on its doorstep. Britain also is needed, he feels, to counterbalance Bonn's growing economic power and to strengthen the West's attraction for a Germany that increasingly may pursue the goal of reunification through direct negotiations with the East.

* * *

Economically, however, Britain's entry into the Common Market means increased industrial competition for France on top of that already coming from West Germany. Not only Mr. Pompidou and his Gaullist supporters, but his pro-Common Market ministers as well, are determined to protect French economic interests in the negotiations with Britain.

France is the chief beneficiary of Common Market farm subsidies and insists that the provisional rules that assure their multilateral financing be made permanent by the end of this year, as provided by the Rome Treaty. West Germany, the biggest contributor to the Common Market's agricultural fund, wants West Europe's soaring farm surpluses restricted by a ceiling on subsidies.

If the agricultural controversy can be resolved, several months of negotiations will still be needed to achieve the common six-nation position upon which France insists for other major aspects of the British negotiations. Under the "package deal" being prepared for the Dec. 1 summit meeting, France will be expected to accept negotiations with Britain next spring in exchange for its partners' pledges to achieve a common position and resolve the farm subsidy problem beforehand.

None of this will be easy. But conflicting economic interests are concrete, understandable issues, which can be compromised. The disappearance of Gen. de Gaulle's ideological "non," which could not be altered by discussion, creates a real possibility for the first time in years that the door to Europe can again be opened for Britain.

THE NEW YORK TIMES.

Sermon From Sweden

By C. L. Sulzberger

STOCKHOLM.—The United States these days is distinctly unpopular in Sweden where the combination of anti-Vietnam war sentiment and curiously hostile propaganda among the youth has distorted the American image. If there is a great silent Swedish majority that likes the United States it is now notable for its silence.

There seems to be a feeling in this neutral country which successfully escaped two world conflicts that there is something nastily nationalistic and selfish in the U.S. approach not only to Vietnam but to the interventionist phase that has marked Washington's policy during the past generation.

I can think of no better way of recalling the genesis of this policy and explaining the philosophical origins of our military presence in both Asia and Europe than by citing passages from a recent little book by Ambassador Charles E. Bohlen called "The Transformation of American Foreign Policy." Bohlen, one of this generation's ablest and wisest diplomats, dates this "transformation" back to the days of President Truman and Secretary Marshall.

No Material Need

Truman argued that America should "come to the assistance of governments who were fighting against armed minorities supported from abroad." Bohlen points out that neither of the initial great contributions of this policy, the Marshall Plan and NATO, were produced "in response to any material need of the United States." He continues:

"The United States needed no more territory. Economically it could assure its needs through the normal processes of trade. It was certainly not due to any American ambition, nor any American wish. It was simply an American response to an external situation which had developed as a result of the war. It was perfectly apparent that unless the United States took up the challenge, a large part of the world would fall prey to totalitarian power. . . .

"One of the difficulties of explaining this policy even in the early days, and even more now, is that our policy is not rooted in any national material interest of the United States, as most foreign policies of other countries in the past have been. It is, for example, very difficult even now to say with great certainty what we do seek. We employ a number of generalities—a world of peace and a world free from threat. . . .

"These thought patterns still exist and trouble our exercise or manipulation, if you will, of diplomacy. Thus, first of all, we have a tendency to regard foreign policy problems from a moral point of view, to see everything in black and white terms as good or bad. This approach tends to make the United States sometimes sound as though we are moralizing, adopting a holier-than-thou attitude which is excessively irritating to the more sophisticated nations.

Activist Current

"Secondly, we have belief that any problem in international affairs is soluble; that with proper goodwill you can bring about a solution—and by that I mean a solution which will be regarded as permanent. In truth there is no such thing as a permanent solution in international affairs. There are only tolerable adjustments."

Critics of our Vietnam policy don't like to concede that this has any relationship to the broad current of activism that originally involved the United States in trans-oceanic commitments. Yet the relationship is plain even if facets of its expression infuriate many people, not least of all our adversaries.

The point made by Bohlen is that this fundamental policy has not been "dictated by any American material need and certainly not in response to any American ambition or desire." That was plainly true for the Marshall Plan and NATO, when the United States with its gold hoard and nuclear preponderance was well able to care for itself alone. It is also true of Vietnam, a disagreeable little land from which Washington would like nothing better than to withdraw once a "tolerable adjustment" can be made.

These facts should be recognized by those who have begun to see America as a covetous, imperial power. We may have been idiots to get into Vietnam but to impute to the United States a desire to acquire profit by its losses in that hideous war is malicious.

Some Swedes might well ponder this while remembering that their own neutrality wouldn't last very long without a continued U.S. commitment to shore up Western Europe.

Neutral Finns Stag SALT Balancing Ac

By Chalmers M. Roberts

HELSINKI.—The Finnish foreign policy line calls for everything to be balanced in every conceivable way, and this has never been more evident than in how the government has handled the current Soviet-American strategic arms limitation talks known as SALT.

At the opening session, for example, Finnish Foreign Minister Ahti Karjalainen read a statement expressing the world's hopes for an accord and offering "neutral ground" for the meeting.

Just how neutral the minister was could be seen from the way the message was handled. The "ladies and gentlemen" at the beginning was in Finnish, English and Russian, in turn. A "ladies and gentlemen" in the middle of the speech was in Russian and then in English. The body of the speech was read in Finnish and the Finnish interpreter alternated the translation, paragraph by paragraph, into English and Russian.

Superb Hosts

The Finns, proud that they were chosen as the hosts, have done a superb job in creating excellent press facilities; here, again, all is balance.

The Foreign Ministry's press section prints daily press bulletins with identical news items in Russian and English. The press section, incidentally, is headed by an old Washington hand, Matti Tuovinen.

Finnish television also plays the one-to-one game. A 40-minute television show, where the camera work probably was superior to what the discussants said, matched this reporter with an Izvestia reporter from Moscow. He was Mikhail (Mike) Sagatelyan, who did a tour in Washington some years ago. The program had to be in English but was presented with Finnish subtitles. A British reporter was added to give a third-country view.

Finnish newspapers also match up interviews with American and Soviet journalists and some visiting Norwegian and Swedish newsmen do the same.

To some degree, the Finns are showing that they can handle an international conference expertly and thus could do the same for the proposed European security conference. Finland, with strong Soviet backing, has consulted some 32 nations, including the United States, on the idea and has had a good many favorable responses, including one from the Vatican.

But that conference is still far off because the United States, Britain and France are all cool to the idea of such a jambo official Western position bilateral East-West conta come first, to determine there would be any hope cess at a full-scale c Nonetheless, the Finns they have shown they cou such a meeting.

The next move in the security conference gam the NATO pronouncemer December ministerial m Brussels.

Finland, of course, is in the sense of free press speech though it is a wel with a mixed economy theless, the country's pos door to the Soviet Unio limit on how far free free speech may go.

Foreign policy foll Paasikivi-Kekkonen line after former President J. kivi and current Presid Kekkonen. The line rei highly successful post satisfies both Moscow Western powers. The born of World War II e in which the Soviets fir Finland before the ger break in Europe. Once began, Finland was on man side—with the en major reparations paid to sians.

Vital Interes

"Our basic hypothesis eign Office official ha "was that the Soviet Un interests as regards Finl be confined. It is conn the Soviet Union's defense interests for it western border." If t could avoid these inter endangered, Finland's interests—sovereignty an —would be protected.

Thus it was concluded was in the Finnish in show to the Soviet Unio have no hostile intentio her and that Finnish could not be used by as a way of attack as Soviet Union."

The line followed by tw presidents has worked. United Nations and else Finns have avoided tak in the East-West confli have managed relations East and West Germar anger of neither. Now maneuvering to bring th of East and West toge conference.

The arrangements her current SALT talks, do alternating use of En Russian, represent that miniature. A visitor can pland the Finnish skill.

The Limitations of Mitchellism

By Rowland Evans and Robert Novak

WASHINGTON.—As opposition to his confirmation as a Supreme Court justice inexorably mounted this autumn, Judge Clement Haynsworth twice requested—and was twice denied—permission to withdraw his name from consideration before the Senate.

The decision to deny Judge Haynsworth's request and instead push his nomination to the bitter end was made by President Nixon on the emphatic recommendation of Attorney General John Mitchell, cabinet strong man and the President's chief political adviser. That decision reflected intense personal pique felt by both Mr. Nixon and his attorney general over the liberal-labor assault against Judge Haynsworth. But more significantly, it reflected John Mitchell's grand political strategy for the Republican party.

Mr. Mitchell has privately explained this in conversation with friends. Although he weeks ago realized that Judge Haynsworth might well be rejected by the Senate, Mr. Mitchell insisted that fighting to the very end—win or lose—would lead toward his great goal: winning over the George Wallace South in 1972. And even if Judge Haynsworth did lose, Mr. Mitchell added, another Southern conservative would be nominated in his place.

Inherent Perils

But Mr. Mitchell was oblivious to the perils inherent in this tactic. He failed to foresee the tension that his strategy would produce between Republican senators, state party organizations, and the White House. Nor did he understand that nothing would have been lost in the South had Judge Haynsworth been withdrawn a month ago and replaced with a conservative such as Rep. Richard Poff of Virginia. Thus, the Haynsworth affair has exposed the limitations of Mitchellism.

Ironically, despite inbred Southern love for lost causes, Mr. Mitchell's tactics have not enchanted the South. Southern Republican leaders feel he should have permitted Judge Haynsworth to withdraw, believing that this would not measurably reduce the President's popularity in Dixie. One such Southern Republican, previously gushing in his admiration for Mr. Mitchell, now gives the attorney general a C-minus in handling the Haynsworth affair.

That means Mr. Mitchell purchased very little in the South at the cost of havoc elsewhere in the party by struggling desperately to save Judge Haynsworth the past month.

The havoc resulted from applying brutal political pressure on undecided Republican senators in a muscular campaign organized by Harry Dent, chief political aide in the White House. Mr. Dent mobilized party elders, county chairmen, financial contributors, and assorted other Republican stalwarts from coast to coast to barrage wavering senators with pleas, advice, and threats.

Occasionally, the campaign went berserk, spoiling a mini-movement to purge Sen. Mark Hatfield in Oregon in 1972 (which evoked telephoned apologies Friday morning from White House counselor Bryce Harlow). In other cases, it exacerbated already abrasive relations between the regular party and a senator—as in Illinois with Charles H. Percy, who ignored some 400 letters received the morning of the vote and opposed Judge Haynsworth anyway.

Even where the campaign squeezed out a vote for Judge Haynsworth, however, its long-term impact may be negative. Sen. Ralph Smith, appointed to Everett McKinley Dirksen's seat from Illinois and an underdog for election in his own right next year, is the classic example.

Arriving in Washington intent on establishing an independent image, Sen. Smith announced his opposition to Judge Haynsworth. He was promptly subjected to a pincer campaign of pressure, from the White House on one hand and Illinois regulars energized by the White House on the other. His consequent flipflop to Judge Haynsworth's side has br to political rock-bottom

Moreover, new animc ward the White House ha ed in the Senate Republi room. One liberal GOI lobbied fiercely by home ticians in Judge Haynsw half, late last month his opposition. Although abruptly ceased, the sen learned that the Whi ordered congressional l ficers in government sa give him a minimum henceforth.

There is no sign that on's unlimited confidenc Mitchell's good judgmen minished one bit. But the Mr. Mitchell's political felt by friend and foe al the party has evaporated Haynsworth affair—a dev that in time could concei fluence the President him

In fact, a decision affe Nov. 15 march on Washing just turn out to be propit Justice Department's b refusal to grant a parad was overruled by the Presi self in a call to Mr. Mitch though it was, this was such reversal suffered by torney general. Conside political shambles of the worth affair, some Re are hoping it is a pre things to come in Washi

International Opinion

Nixon on Trade

President Nixon has described his trade bill as modest in scope but important in substance. Very true, Mr. President! And it is full of traps. Except for the overdue request for abolition of the American selling price system, the President's commitment to liberal trade has remained merely rhetorical. His request for more powers to curb imports and further exports may prove a heavy blow to the marketing of foreign products in the United States.

—From the (Munich) Merkur.

The Vietnam Atrocity Charges

The Americans—as a community and individually—owe the world the truth. It must be exacted in full and made public. This truth is needed by America and the Americans themselves, for today and tomorrow.

From this could come a sobering up and a fresh start for new efforts to save something which for that country is certainly much more significant than the number of Americans killed and injured in Vietnam.

One should openly say that involved is a genocide. Massacre in the villages of South Vietnam can be compared only to the crimes of Hitler's fascist soldiers in Europe or with massacres in the darkest hours of colonial times.

The Americans took a leading place at the Nuernberg trial. They know why it was held.

The entire world is reminding and warning them about this. And with good intentions.

—From Borba (Belgrade).

* * *

Such atrocities, alas, are remindful of the tragedies we have gone through in all wars. They cannot have any excuse. But the Americans have nevertheless saved honor by revealing them to the world and permitting the punishment of the culprits. In other countries, silence would have been imperative and people who would have tried to break it would have been forcibly silenced. The fact deserves to be underscored—without any other comment.

—From Paris-Jour.

Letters

War Guilt

A headline: "S. Vietnamese Accuse GIs of Killing 567 Villagers."

Here we go again. A small episode is singled out and a scapegoat produced. Small? Certainly. Has anyone ever tried to add up the "enemy dead" reported in official communiques over, say, the last five years? (Always *dead*; never any wounded or prisoners, and never indicating either sex or age of these dead.) So why this sudden fuss over a mere 567 men, women and children? They were undoubtedly duly reported in one of those horrible sadistic communiques.

And how does one fight a purely political war when every man, woman and child is the potential enemy whom one is encouraged to "seek and destroy" in order to produce the daily quota of dead "Gooks" for ghoulish communique-writers?

Is an obscure platoon commander wiping out an "enemy" village more guilty of atrocity than a flier dropping napalm on an "enemy" city? Or a general who orders it dropped? Or a politician who orders the general to "bomb hell out of enemy territory" to get a few extra votes for the next election?

The mood of the American people seems to be ripe for producing a few "bastards" to absorb the onus for a dirty war, never even declared by Congress, while those who advocate, initiate and promote such wars get votes, medals and, eventually, monuments for turning decent American boys into murderers.

GEORGE ST. GEORGE.

Paris.

Cartoon Taste

How much longer must your readers suffer the indignity of cartoons like those of Herblock and Mauldin? No one will question the right of dissent, but to ridicule and denigrate the President of the United States in such offensive manner, to say the least, is poor taste and certainly not befitting an American newspaper published abroad which is meant to convey an acceptable image of our country to the world at large.

ROBERT H. PINKERLY.

Zurich.

In the International Edition

Seventy-Five Years Ago

Nov. 26, 1894

PARIS—We have pointed out the faults of the French Chambers in these columns often enough to have a right to congratulate them in their patriotism. Prince Bismarck often held it up as an example to the Reichstag, and said there was never any opposition in France when the honor of the flag was at stake. This has been seen again in the sitting of the French Chambers, while discussing the Madagascar question. Both Moderates and Radicals support the present government.

Fifty Years Ago

Nov. 26, 1919

NEW ORLEANS—Whiskey, 4 percent beer, wines, cordials, in short, complete bar-room assortments of liquors, were purchased freely in New Orleans tonight following the granting of an injunction today by Federal Judge Foster, which, in effect, held wartime prohibition acts unconstitutional. Less than an hour after Judge Foster had enjoined federal authorities from interfering with the sale of bonded whiskies, the great rush was on, and "straight liquor" flowed again.

A Grim Outlook

Black Africa in a Vise: owing Need, Reduced Aid

By R. W. Apple Jr.

YORK (NYT).—When ey talk about Black diplomats and scholars nes divide it into "coun- and "noncountries." define as "countries" the where size, location, eco- resources and leadership offer some hope of eco- self-sufficiency and devel- —nations such as Nigeria, ory Coast, the former Congo, Kenya, perhaps perhaps Cameroon.

"noncountries," harsh the verdict may seem, to have no such hopes. are places like Chad, is so isolated that it takes m of gasoline to deliver r gallon to Fort-Lamy, pital; Rwanda and Bu- where as many as 500 s may live on a single, reeless square mile; Bots- which has not a single f paved highway.

oth Types Need Aid

groups of nations need aid: the "countries" to , to industrialize, to the "noncountries" mere- keep going. Neither is what it needs, and is likely to get it. need is enormous. Africa g that you could fit the States, Europe, the Brit- es and India into it with to spare—lacks all the ities of modern life. You ee it in the clamorous, g slums of Lagos, in the cing desert of Niger, in rowds of dirty, big-eyed s outside a luxurious in Dahomey. enough housing. Not n water. Not enough s.

Black Africa, having suf- through the eras of slave- g and colonialism, has had ngular misfortune to ar- at this state of develop- at a time when foreign nic aid is drying up. situation was concisely last month in a report e World Bank—formally nternational Bank for Re- uction and Development—commission of eight men eight countries. The com- n said that the climate nding foreign-aid pro- s was "heavy with disil- and distrust."

tain, buffeted by economic ies at home, is trying to nch in Africa, where more a dozen of her former ies have attained an inde- ence tempered by economic nce on the erstwhile mother try. In Malawi, for ex- le, the British hope to ndon budget subsidies within years.

French May Retrench

ith the end of the De Gaulle France's aid to Africa is expected to dwindle. n. Charles de Gaulle never t that the first feeble voices d in support of free France g World War II came from ultry little Congo river port razzaville, and he tailored aid program accordingly. uccessor, President Georges idou, is far less responsive e emotionalism of colonial ry.

ther Communist China nor oviet Union, despite inten- efforts in a few countries as Tanzania and Mali, is red to invest in the con- as a whole. Western nats expect Communist ef- to fall off, too, in coming

for the United States, is clearly the lowest ty in an era of increasing essional opposition to for- aid appropriations. eport drafted in 1966 by rd M. Korry, former am- dor to Ethiopia, repre- d an attempt to put the er available funds to better

h its adoption, the United s began concentrating on major countries—Nigeria, a, the Congo, Kenya—and g aid offices in a dozen or more African capitals, trying to persuade smaller countries to take part in regional development efforts and searching for multilateral approaches.

Most American diplomats would agree that the report has succeeded in giving greater impact to the $155 million that Washington spent on African economic assistance last year. But for the less fortunate countries the cutoff has hurt.

For the moment regionalism seems out of reach in Africa, partly because of suspicions engendered by the new nationalism, partly because the former colonial powers discourage the breaking of apron strings. For example, French-speaking Niger gets most of her imports from Dahomey, not through Nigeria, because Dahomey, though less accessible, is in the franc zone and Nigeria is not.

Senegal has a cement plant that operates well below capacity, but tariff barriers make it cheaper for Gambia, which is almost surrounded by Senegal, to import cement from Britain.

American attempts to promote multinational aid programs have been hindered by the complex restrictions ordained by Congress. A U.S. ambassador said recently that he felt humiliated every time he was forced to explain the regulations to diplomat colleagues.

The single truly hopeful sign for African economies in recent months has been the attitude of Robert S. McNamara during his first two years as president of the World Bank. Promising to avoid "the general paralysis" of other aid officials, he plans to triple loans to African nations by 1973.

At the same time that foreign aid is declining, Africa's hopes of earning enough foreign exchange to finance development are dimming.

With some exceptions—copper for one—the commodities that tropical Africa sells bring in less money and the manufactured goods it needs cost more. A sack of peanuts will pay for only about half as much steel as it would a few years ago. What is worse, many African crops are obsolescent; for example, the use of Tanzania's sisal in rope products is threatened by synthetics.

European Domination

A further problem—one that lies behind the periodic cries of neo-colonialism—is European domination of large-scale commerce and industry.

White men own and manage the rubber plantations in Liberia, the flour mills in the Ivory Coast, the aluminum smelter in Ghana, the oil fields in Kenya, the banana groves of Somalia. They have a virtual monopoly on capital and skills.

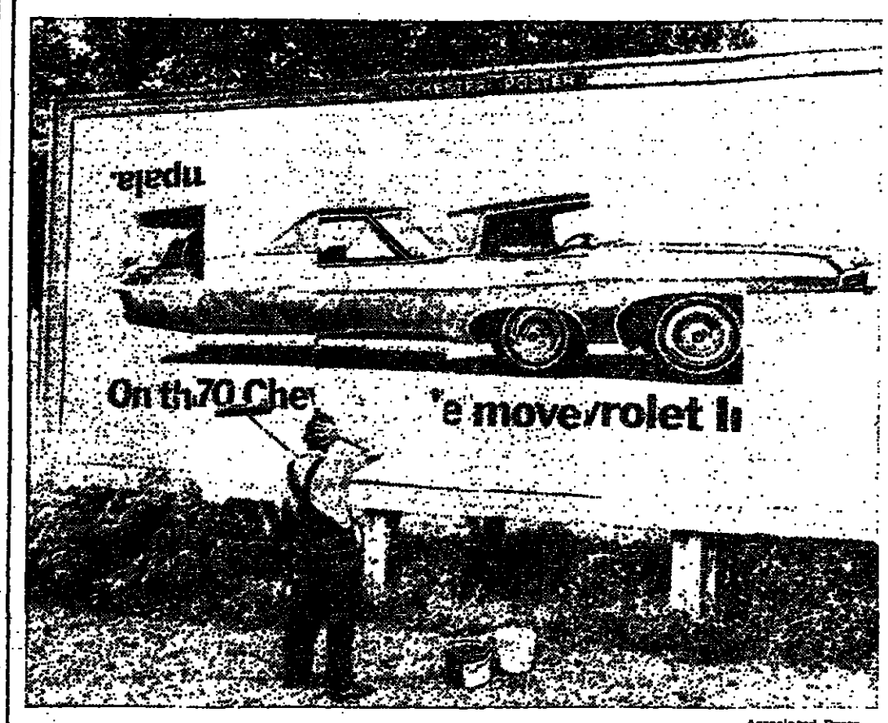

But pressures for "Africanization" of ownership and personnel are building up across Africa, even in the Ivory Coast, President Félix Houphouet-Boigny's citadel of laissez-faire.

Both Zambia and Tanzania have partially nationalized most of their industries. The Congo has just concluded an agreement to take over the huge Belgian mining company Union Minière du Haut-Katanga. Mixed state-private enterprises seem likely to emerge in Uganda soon.

Even in most of these, however, the key personnel remain European; the European populations of cities like Dakar and Abidjan and Nairobi, which seem about as African as Miami, have increased since independence.

Only a few companies are rapidly Africanizing their staffs, and thus giving Africans the experience they will need to start companies on their own someday.

Mr. Apple, the author of this article, recently completed a nine-month journey through 32 countries of Black Africa.

More Threats Are Traded By 2 Congos

BRAZZAVILLE, Congo, Nov. 25 (UPI).—The official radio today asserted the government has evidence that armed commandos have been sent into the country from neighboring Congo (Kinshasa).

Simultaneously, the state-operated Congolese News Agency linked President Joseph Désiré Mobutu of Congo (Kinshasa) to Nazi leader Adolf Hitler and warned Congo (Brazzaville) would fight with "revolutionary violence" if attacked by Kinshasa.

The accusations kept on the boil the war of nerves waged by the two Congos since the discovery of an alleged Kinshasa-backed plot early in November, and Mr. Mobutu's warning Sunday he could crush Brazzaville within two hours.

While the estranged ex-colonies' radio stations kept swapping invective, diplomatic sources reported that attempts were being made to reconcile the two Congos by African leaders attending ceremonies in Kinshasa marking the fourth anniversary of the coup that brought President Mobutu to power.

The sources said the visiting African dignitaries, headed by Ivory Coast President Félix Houphouet-Boigny, would try to smooth relations between the two countries which have been at odds, on and off, ever since France gave independence to Congo (Brazzaville) and Belgium did the same to Congo (Kinshasa) ten years ago.

In a broadcast last night, Gen. Joachim Yhombi, the Congo (Brazzaville) Army chief of staff, said: "We are ready to fight a war, if we are forced to do it. We will fight, and we are sure that without war material, without planes, napalm, we will win that war—because we are the stronger ones."

The people's militia and army continued patrolling the streets of the sprawling 185,000-person capital today.

Congo (Kinshasa) has an army of over 50,000 men, including two paracommando battalions, plus several B-26 bombers, T-6 and T-28 ground-support trainers, about two dozen DC-3 and DC-4 transports and several jet fighters.

The Brazzaville broadcast today said evidence compiled by the government shows that political refugees living in Kinshasa are allowed to plot against Brazzaville and that "at least for the fourth time an actual military arsenal has been sent across the Congo River from the other side."

Postal Service a Target

Power Cuts Expected Today As French Walkout Begins

PARIS, Nov. 26.—Electricity and gas workers struck today for the second time in a week, but power cuts were not expected until tomorrow (Wednesday).

The cuts are expected to be limited to a 12-hour period beginning at 7 a.m. tomorrow, and will be aimed mostly at industrial users. The cuts, however, are likely to be more effective than last week, when only the Communist-led General Labor Confederation (CGT) struck.

Police intervention at several struck plants last week prompted the Democratic Labor Confederation (CFDT) to rally to the CGT for the new strike. The unions plan to cut the power to train and subway service tomorrow, something not done last week.

The strikers demonstrated today, marching from the electricity headquarters near the Champs-Elysées to the central gas building in north Paris, shouting slogans calling for pay raises.

Scores of police marched alongside the demonstration and stood guard at crossroads. But the procession was generally good-humored and stopped at one point to allow through a car taking a bride to church.

In the southeastern port of Bordeaux, strikers drove a procession of 100 cars through the center of the city and distributed leaflets explaining the reasons for the strike, which calls for shorter working hours.

As labor discontent bubbled in other sectors, postal workers in Paris announced that mail deliveries will be reduced on Thursday. Local stoppages have also been ordered in other parts of the country.

About 4,000 workers at the Peugeot automobile plant in Sochaux were idled today by a walkout of 60 workers in the paint shop.

Localized strikes also broke out today among railroad workers and employees of the Paris rapid transit system. In all cases the workers are asking for wages to keep up with rising prices, and reduced hours.

The labor troubles come at the same time France is having difficulties with its farmers. Yesterday, more than 30,000 farmers demonstrated throughout France, protesting against government plans to reduce eventually their numbers.

Blind Woman's Braille Cards Win Bridge Tourney

MIAMI BEACH, Fla., Nov. 25 (AP).—A blind woman playing with braille cards has won a national bridge championship with her husband-partner at the American Bridge League fall tournament.

Mrs. Lois Wiley's German shepherd seeing-eye dog sat beside her as she and her husband won the mixed pairs second flight Saturday night.

The other players called out the cards for Mrs. Wiley's benefit as they played them. Cards in dummies also were read to her. At the tournament, cards are pre-dealt by computer, and those assigned to Mrs. Wiley were transferred to her braille deck.

Church and Red Party Office Are Targets of Bombs in Italy

ROME, Nov. 25 (UPI).—Bombs exploded outside a church and a Communist party office today and Rome bus workers began two days of strikes timed to cause maximum disruption to traffic.

The blasts outside the main church of Biancavilla, Sicily, and the Communist office in the northern town of Vigevano caused no injuries and little damage. They were the latest in a wave of violence that reached a climax last Wednesday when a policeman was killed and scores of persons injured in labor riots in Milan.

Rome bus and streetcar workers, demanding larger staffs and higher pay, called a four-hour strike which started at 4 p.m. today and a five-hour stoppage beginning at 9:30 a.m. tomorrow. Both strikes were calculated to force hundreds of thousands of commuters to drive to work, causing massive traffic jams.

Millers and pasta makers planned a 24-hour strike tomorrow. Metal workers and treasury employees planned scattered strikes over most of the week.

Authorities, apparently worried by rightist threats to take the law into their own hands unless law and order is restored, acted against some leftist extremists today.

Francesco Tolin, 40, a teacher and editor of the periodical Potere Operaio (Workers Power), was arrested in Padua and taken to Rome for trial. Assistant District Attorney Vittorio Occorsio charged him with "instigating workers all over Italy to revolt against the state" and encouraging Fiat auto workers to damage cars and use violence against company officials.

In Bergamo, police charged 19 youths with staging a seditious gathering and insulting public officials during last Wednesday's general strike.

Nenni Warns of Fascism

MILAN, Nov. 25 (Reuters).—Former Socialist party President Pietro Nenni warned today that Italy's wave of violence and industrial unrest could mean the death of democracy.

It could bring a return to dictatorship and oppression, he said.

Mr. Nenni appealed to feuding politicians to reform a stable center-left coalition government and prevent a repetition of the events which brought Fascism to power in the 1920s.

The 78-year-old Nenni was commenting in the Milan newspaper Corriere Della Sera.

He recalled his own experience of the period after World War I, when Fascists used strikes, factory occupations and general discontent to whip up violence and eventually seize power.

Mr. Nenni resigned as party president and retired from active politics after a Socialist split caused the fall of the center-left coalition government in July.

After De Gaulle, Deluge of Tourists

By Ronald Koven

WASHINGTON, Nov. 25 (WP).—"The Lafayette sauce is no longer turning sour," says a professional in Franco-American relations who notes how quickly the restraints to friendship were dropped after President Charles de Gaulle left power in April.

There has been a rush of official and semi-official French visitors to the United States this fall and a revival of those official occasions where speakers and toastmasters are fond of evoking Lafayette, Rochambeau, Tom Paine, the Louisiana Purchase, Pershing and the Normandy beaches.

The Pompidou government is following up encouragement of a French return to the United States with a million-dollar Madison Avenue advertising campaign for Americans to put France back on their tourist itineraries. "Suddenly, Everybody's Going to France" is to be a slogan for the campaign on behalf of the French Government Tourist Office.

Once the general was gone, the way was greased for French delegations to visit America by U.S. Ambassador Sargent Shriver, a hearty advocate of the people-to-people approach. From various foundation and private sources in both countries, he got subsidies for a number of groups to take advantage of invitations he solicited to visit with their American counterparts.

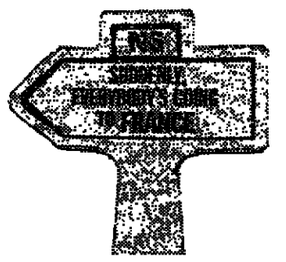

Groups visiting this fall included six high civil servants, 100 air cadets, 15 young parliamentarians, six prefects (local governors), 50 young Paris lawyers, ten labor leaders and several groups of journalists.

French sources here said there are again responsive audiences for the French Embassy's ongoing program to sell French culture to an American public which grew wary during the De Gaulle years. Such extremes as U.S. congressmen demanding that U.S. military cemeteries be brought home from France are now just memories.

An exception, French officials admit, is among American Jews, who are still embittered by the Pompidou government's refusal to reverse Gen. de Gaulle's embargo on planes for Israel.

Both French and Americans in the business of Franco-American relations speak of "the bad years" as if it had literally been years since things improved. But it has only been about 18 months since the anti-Americanism of French state radio and television was toned down when the Vietnam peace talks began in Paris.

Some observers attribute the ease with which officials have been able to place "the bad years" at such a distance in time to the policy of former President Lyndon B. Johnson and Mr. Shriver's predecessor, Charles E. Bohlen, of "not fussing with De Gaulle." It was defended at the time as an attempt to prevent an official American reaction to the general's pinpricks from turning into reciprocal national hatred which could prevent eventual reconciliation.

Poster from the Visit-France campaign being conducted in the United States.

On the policy level, State Department officials say the French are now all smiles but that there has been little change in substance. The only major area in which Franco-American cooperation has been revived is in international monetary affairs, where the weakened franc needs the support of the dollar.

Soon after announcing firm dates for his forthcoming state visit to Washington in February, President Georges Pompidou balanced it with word from the Elysée Palace that he would also visit Moscow.

After making a side trip to Washington from the United Nations General Assembly meeting in New York this fall, Foreign Minister Maurice Schumann went almost directly to Moscow, where he issued an invitation to Paris for the ruling troika of Brezhnev, Kosygin and Podgorny.

It is much the same in the military sphere. U.S. officials say the French are more cordial personally, but the visit here of Armed Forces Chief of Staff Michel Fourquet was preceded by a trip to Russia in late October by Adm. André Patou. He is the French naval chief of staff. His control of the developing French nuclear missile submarine program makes him a key figure.

"Somebody up there in the French government is obviously keeping a Moscow-Washington scorecard," said a U.S. official.

First to benefit from the improved atmosphere should be the lagging French tourist trade. Although the final figures are not yet available, the French say that 1969 was a measurable improvement over 1968, when only 580,000 American visitors to France spent $91 million there. This was a sharp decline from the previous year, 1967, when 717,000 Americans spent $119 million in France.

Soviet Woman Seeks Asylum

French Diplomat in Scuffle With a Policeman in Moscow

MOSCOW, Nov. 25 (Reuters).—A senior French diplomat struggled with a Soviet policeman trying to drag a would-be Russian political refugee out of the compound of the French Embassy here today.

Several eyewitnesses said the middle-aged woman, believed to be a schoolteacher from southern Russia, rushed past the Soviet policeman permanently on duty at the embassy gates into the compound.

The policeman chased her about 30 yards into the compound, which is French territory under diplomatic regulations, grabbed her by the arm and tried to drag her back.

The French diplomat, named by the eyewitnesses as J.M. Le Breton, one of the embassy's two counselors, took hold of the woman's other arm and ordered the policeman to leave embassy territory.

There was a brief scuffle before the policeman retreated and the woman was taken into the embassy.

The witnesses said a Soviet citizen employed by the embassy as a chauffeur joined in on the policeman's side and was instantly dismissed.

One version said the woman, who was shouting, "My only desire is to leave the Soviet Union," fell to the ground during the scuffle but was not hurt.

Inside the embassy the unidentified woman declared she wanted political asylum. But she was turned over to Soviet authorities about eight hours later.

French Ambassador Roger Seydoux later lodged a strong protest with the Soviet Foreign Ministry against alleged violations of embassy territorial rights, French sources said.

Our new plane isn't very new to our people.

Our new plane is the Boeing 747. The largest and fastest jetliner ever built. Yet for us it's just another Boeing. Because we have an all-Boeing jet fleet.

So our people don't have to get to know an entirely new aircraft.

But even so, we've sent our mechanics to Boeing's factory for thorough training.

Only those of our pilots with years of experience on today's biggest Boeing jet, the 707, will get to fly the 747.

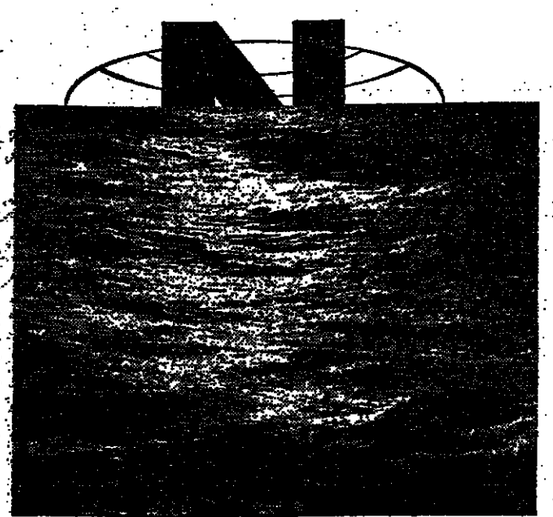

And they're now going through training at Boeing and our own training center in Tucson, Arizona. In addition, they've sweated it out in our 747 flight simulator.

To get our stewards and stewardesses accustomed to the new dimensions of this plane, we built a model 747 in Frankfurt. By using it for practice, they've helped our designers work out a most efficient kitchen arrangement, to give you good, fast service.

So we're all set to take off in April, 1970. A great time to fly Lufthansa Frankfurt-New York.

Lufthansa

...and up

PARIS THEATER

Andreyev: A Study of Black on Black

By Thomas Quinn Curtiss

PARIS.—Leonid Andreyev remains fifty years after his death the most popular Russian playwright since Chekov. Turning violently anti-Bolshevik during the October Revolution (despite his earlier career as a revolutionary and his harassment by the Czarist censors), he fled to Finland where he died in 1918. As a result of this "reactionary" behavior he was neither publicized nor acted in Soviet Russia for many years, but there is a strong staying power to his work. Zavadsky has recently staged his "Days of Our Lives" in Moscow. His plays are now being produced in his homeland.

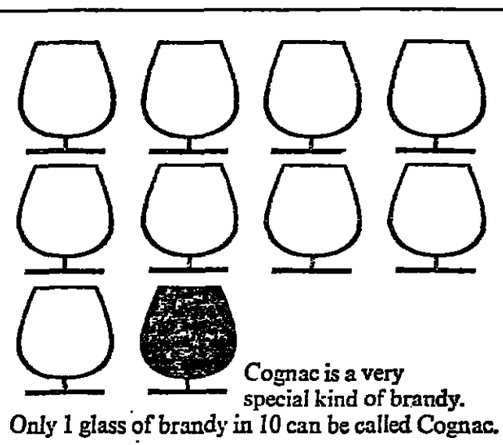

Was he a great writer? The point is still disputed, but that he was a writer of enormous and compelling talent would be impossible to deny. With gloomy eloquence he preserved the dark years of Russia between the abortive 1905 rising and October and, with a mystic defeatism, he sung their tragic spirit.

At the Vieux Colombier an Andreyev play, "La Valse des Chiens," is having its belated Parisian premiere. It is one of its author's last plays and, though inferior to his masterpiece, "He Who Gets Slapped", it casts a hypnotic spell. A study in black-on-black, it might in less skilled hands become monotonous with its unrelieved darkness of narrative, but Andreyev, a genius of stagecraft, quickens its somber hues with nervous dialogue, grotesque comic touches and a triumphant theatrical dexterity. Throughout it sustains a gripping intensity.

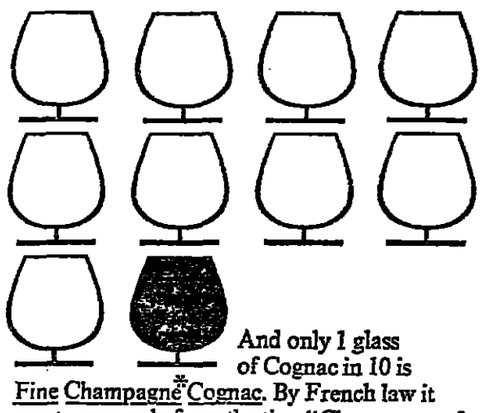

The story is one Andreyev never tired of telling: the tale of man's inevitable surrender to remorseless destiny. On this occasion the protagonist is a young bank clerk of Petrograd, elated over his forthcoming marriage and happy in the new home he has purchased. On the eve of his wedding his fiancée marries another and his brother plots to murder him for an inheritance. He takes to drink and in his befuddled state plans to embezzle and flee abroad. But the whole depressing struggle is too much for him and, convinced that suicide is the only dignified exit, he puts a bullet through his head.

Such an unswervingly pessimistic play with its dead-end philosophy coming soon after the rise of the first curtain requires extreme caution and care in its production for it skirts caricature closely. Enacted by a band of cabotins—and it is just such a dish as "hams" relish—it would be unbearable and court certain and ridiculous disaster. Fortunately it has been splendidly directed by Laurent Terzieff, who plays its hopeless "hero" with subtle shadings that humanize the curious portrait. The crumbling stamina of the man as fate deals him blow upon blow is wonderfully realized in this interpretation, providing a clinical study of character in decay. It is a performance of depth and pathos, the creation of an actor who is an artist.

Contrary to the customary policy of actor-managers, Terzieff has selected an excellent supporting cast. Denis Manuel as the evil brother, an Iago-like figure, and Marc Eyraud as the oafish drinking companion, a fellow of large family and petty ideas, deliver characterizations of substance and conviction and Pascale de Boysson is the runaway fiancée who returns to indulge in additional betrayal.

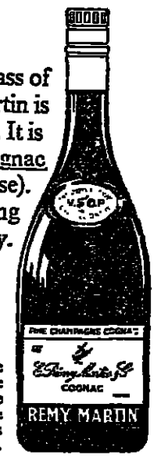

Cognac is a very special kind of brandy.
Only 1 glass of brandy in 10 can be called Cognac.

And only 1 glass of Cognac in 10 is Fine Champagne* Cognac. By French law it must come only from the tiny "Champagne of Cognac" region where the best of all Cognac is produced.

Every glass of Remy Martin is not just Cognac. It is Fine Champagne* Cognac (V.S.O.P., of course). We produce nothing of lesser quality.

* Fine Champagne Cognac is produced from the best growths : the Grande and Petite Champagne Regions of the Cognac District.

REMY MARTIN
Fine Champagne V.S.O.P.

Which of These Modiglianis Is a Fake?

FAKE!
The Story of Elmyr de Hory, the Greatest Art Forger of Our Time. By Clifford Irving. Illustrated. McGraw-Hill. 243 pp. $7.95.

THE DISCRIMINATING THIEF
By David Leitch. Illustrated. Holt, Rinehart & Winston. 182 pp. $5.95.

By Joel Sayre

THE root idea of Clifford Irving's *Fake!* is the counterfeiting of pictures that purportedly came from high-priced, modern European artists. David Leitch's *The Discriminating Thief* has to do with the stealing of pedigreed art treasures. Both books are first-rate jobs of reporting, detailing the fantastic scores made by the crooks and presenting some truly grotesque characters. Nature often *does* make a bum out of the creative imagination. If you enjoyed Proust and Dostoevski, try Irving and Leitch.

The mob that Elmyr de *Hory*, the Greatest Art Forger of Our Time, belonged to comprised three queers—two screamers and a hand-wringer. The hand-wringer was Elmyr, a Hungarian—an alleged aristocrat tinctured with the old *misterioso*, middle-aged, dapper, beautifully dressed, monocled, jug-eared. You pronounced his name with the beat on the second syllable, the *-myr* rhyming with dear, as in the old Ronald Firbank joke: "The President of Haiti is a perfect dear." *Elmyr!*

All Over the World

The paintings the boys unloaded all over the world between 1961-67 were forgeries of Picasso, Matisse, Modigliani, Vlaminck, Dufy and their contemporaries. If they had gone undetected as fakes, they would bring about $60 million today. Leader of the mob was Fernand Legros, a naturalized American—on your feet, fellas!—just turned thirty, born in Egypt of a Greek mother and a Frenchman employed by the Suez Canal Company. Formerly a chorus boy in Paris, Fernand was swart, long-nosed, beady-eyed, with thin black hair. He minced when he walked and looked, somebody said, like "the kind of sleazy gigolo who creeps up on you, at 4 a.m. in Montmartre to sell you dirty postcards." There was more to Fernand, though, than that. Listen to Elmyr:

He was a man totally without taste. But he developed an incredible veneer which completely covered his coarseness—he had the cleverness of the Oriental people, the Eastern sense of humbugging. He could get power over you.

Fernand seduced the mob's third member, Réal Lessard, a bushy-haired, freckle-nosed, sparkle-toothed French-Canadian whose age was nineteen when Elmyr picked him up as he was toasting himself on a public beach in Miami. Réal had hitchhiked from Canada to Florida. Said Fernand: "When I first met him he was a simple boy with a sixth grade education and really rather a sweet person... He grew up fast."

Fernand grew up even faster. As things prospered, he bought an apartment on the Avenue Henri-Martin for $250,000 and installed $160,000 worth of furnishings that included solid gold faucets for three bathrooms. He presented Réal with an Alfa Romeo convertible of special design (cream-colored, red leather seats); gave his dear old Greek mother a mink coat and enlarged his father's villa near Cannes. Himself he pampered with an outsize Renault limousine and a red Cadillac.

Freaking On Red

The color red was Fernand's freak. Seems that during his childhood in King Farouk's Egypt only the royal family had the right to use red which, therefore, symbolized wealth, prestige and power—precisely what Fernand was after. His apartment walls in Paris were finished in red velvet: red also were his shirts, sweaters, pajamas and the silk linings of his coats.

Elmyr's situation was tragi-farcical—if there is such a word—only with Elmyr it wasn't all that funny. He had made repeated efforts to "turn square," i.e., earn a living from "honest" pictures produced under his own name; but the dealers wanted none of them. What they couldn't get enough of, though, were canvases and drawings by Picasso, Matisse and the rest of the contemporary greats.

So Elmyr obliged. During the 20 years of his forging career, he drew or painted an estimated thousand works of art which were then attributed to the various modern masters, sold by major art galleries and hung in modern art museums and premier private collections. The Fogg Art Museum at Harvard bought one of Elmyr's Matisse drawings. To a Texas oil tycoon with the lovely name of Arger Hurtle Meadows, Fernand and Réal sold 15 Dufys, seven Modiglianis, five Vlaminckx, eight Derains, three Matisses, two Bonnards, one Chagall, one Degas, one Marquet, one Laurencin, one Gauguin and a Picasso—all Elmyr's work. The boys unloaded $250,000 worth of Elmyr's phony masterpieces in Japan—Elmyr's cut in the loot was a TV set.

"Undoubtedly he is some kind of genius," F. R. Fehse, a Swiss gallery owner, said of Elmyr.

"But which kind I don't know. All I know is that no one quite like him ever existed before. And we all pray no one like him will ever exist again."

How this zany trio fared and at last fell on its collective face makes uproarious reading. Clifford Irving, who served as Elmyr's father confessor, is an old friend of his. Although Zsa Zsa Gabor once said, referring to Elmyr, "All Hungarians are liars," it seemed to me that, once Mr. Irving had got Elmyr down to Florida and into mail-order masterpiece forgery, the book's credibility was completely acceptable.

David Leitch, who wrote *The Discriminating Thief*, co-authored *The Philby Conspiracy*, a notable account of that con man who was a master of his own specialty, world politics.

The mob in *Thief*, though slightly larger, wasn't as flamboyant as Fernand's, nor as far-ranging. Still, its more than $8 million worth of loot in less than six years wasn't bad. Known as the Châteaux Gang, it concentrated on burglarizing the grand country mansions scattered around France and removing only their very best eighteenth-century furniture and china. Its other preoccupation was ancient churches, from which it stole such medieval and Renaissance treasures as paintings, altar pieces and tapestries.

France being the wonderful country it is, its name for the police element specially assigned to these crimes was *Le Groupe pour la Répression du Banditisme* — or the G.R.B. Heading the G.R.B. was Commissaire René Chevalier, who came from Norma formerly specialized i and resembled Simen gret. Helping him w Dupont, director-gen government's Histor ments Department.

The Answer

Top: "Portrait de Jeanne Hébuterne," a fake Modigliani painted by Elmyr in 1964 and sold in 1965 to Algur Hurtle Meadows. Elmyr combined the features of Mlle. Hébuterne with the pose of Mme. Lunia Czechoswska in another Modigliani painting. Bottom: "Yellow Sweater (Portrait of Mlle. Hébuterne)," painted by Modigliani in 1919.

The Memoirs of Hector Berlioz

Translated and Edited by David Cairns. Knopf. 636 pp. $12.50.

Reviewed by
By Thomas Lask

EVEN if he were not the greatest figure in 19th-century French music, Hector Berlioz would still be, through these memoirs, a unique and singular personality. His skeleton was not fleshed out with tissue but with nerve endings. His was a naked sensibility and he records fearlessly and with overpowering conviction the storms and stresses, the periods of exaltation and of despondency, the moments of ecstasy and the moments of despair that made up his life. His manner is excessive and I think as alien to us as it was to the century that preceded his. To that latter age he would have appeared half mad, and it would have regarded his experiences and their recital with fastidious distaste.

His determination to kill his betrothed, her mother and the new lover when he learned he had been jilted sounds like the libretto of an opera buffa. And in spite of his genuine strong feelings, Berlioz saw the incident in a little of the same light. His version is full of anger, jealousy, resentment. But it is also shot through with laughter, and the preposterous extravaganza is described with a blend of pain and perceptive humor that makes it a gem in the narratives of personal confession.

Hector Berlioz

When he heard great music magnificently played or heard his own music sound close to the way he had imagined it, he responded in a way that ranged from tears to a literal paralysis of the faculties. But what the reader will remember is not so much his reaction as the excitement of the performance that produced it. His description of the Berlin version of his Requiem in 1843 comes as near as words can to capturing the feel of the music in the hall and the effect of the orchestral sound meeting the massed voices of the choir.

It's not that Berlioz's response is so rare. Even Toscanini admitted to it:. Once when he was being recalled again and again to the stage, he turned in exasperation to an official in the wings and asked: "What do they want?" "They are very much moved," the man replied "and this is how they show it. What did you do when you felt this way?" "I wept," Toscanini said.

Berlioz is not only frank in his responses but is also able to write about them in a way that makes the experience sacred rather than stickily sentimental.

The "Memoirs" are not on this emotional level throughout, of course. There is a lot of straight chronology in the account. He tells of his start in music, the opposition of his parents, his paltry training, his attraction to composition, his increasing mastery and his battle for recognition. David Cairns, the editor, remarks that in many ways Berlioz was a product of his time. But he was also sufficiently original to have been troublesome to his colleagues and the traditional musicmaker. He made demands on them they couldn't meet. In the Requiem there is a fanfare for four sets of trombones. Although the sequence each plays is simple enough and the groups he rehearsed had no trouble doing them alone, there was only disaster when they came together. Writing about it, Berlioz is more puzzled than angry. Often he couldn't get the instrumentalists he needed. For some reason there wasn't a decent English horn player or harpist in all of Europe. When the orchestra was good, the singers weren't. sufficed, the house quats.

Berlioz came at a French musical life nated by Rossini. Ch the spectaculars in house. Agricultural Problem Cited

EC Official Predicts U.K. Membership Talks Will Fail

By Clyde H. Farnsworth

USSELS, Nov. 25 (NYT).—A official of the European Eco- Community predicted today negotiations for British mem- up will begin towards the end xt year, will last about two and will end in failure be- Britain will not be able to t the conditions set by the ommon Market countries.

e official, who asked not to identified, said he expected looser form of relationship evelop in which Britain and other applicant countries— nark, Ireland and Norway— d have closer economic ties with the community and a common political institution for coordinating foreign policy decisions.

The official spoke as Common Market ministers held a preliminary discussion, six days before the community's summit meeting on the problems of financing agriculture.

France wants the community to accept permanent responsibility for financing agriculture in the member states, laying this down as its condition for agreeing to open negotiations with Britain and the other applicants.

The official, who is close to the French government, said Paris takes agricultural financing so seriously that it will, in effect, break up the community by rebuilding tariff walls if a satisfactory farm agreement is not reached.

He forecast a major community crisis as a result of the French demands, with Italy and the Netherlands offering the chief resistance because of what he described as their "reluctance to pay."

The Common Market executive authority has submitted proposals under which wheat and dairy prices would be gradually lowered over a five-year period and production quotas would be set for sugar. But with social unrest in Italy and farmer unrest both in France and West Germany, the political authorities are not prepared at the moment to take any price-cutting action.

Yet, so long as unlimited surpluses threaten to raise the costs of agricultural support, the same authorities are reluctant to agree to a permanent system of agricultural financing.

This is the dilemma that leaders of the Six will face when they sit down together in The Hague next Monday and Tuesday for their long-anticipated summit conference.

The official said that French President Georges Pompidou will not agree to a date at The Hague for opening negotiations with Britain but is now determined not to block negotiations once a farm agreement is reached.

He went on to say that the other Common Market leaders will not press France out of fears the summit conference would collapse.

ccord Set n Vegetable, ruit Policy

By Nel Slis

USSELS, Nov. 25 (AP).—After years of argument, the Euro- Economic Community min- s agreed today on a common y for fruit and vegetables, to effect Jan. 1.

ench Agriculture Minister ues Duhamel said the agree- t augurs well for decision on ncing the EEC farm policy as hole.

aly's Giacomo Sedati said he now satisfied that there will ighter control of the prices at ch non-member countries offer r fruit and vegetables to the mon Market.

he agreement covers the setting of a common outer duty to be ied to imports from outside community.

he new policy also calls for pensatory taxes that can be lied if non-member countries r at prices below a certain rence price to be established the EEC executive commission. n case of disturbances on the rket, despite these compensatory es, the commission can put in ect a safeguard clause under ich imports from non-member ntries can be stopped.

All member states must allow the ying in of surpluses and pay for through producer organizations, ich will be reimbursed by the GC.

Destruction of surpluses is forbidden. They are to be used as ttle food, or to make alcohol in e case of fruits, or be distributed groups suith as old-age homes, e army or similar organizations. Export rebates may be accorded certain cases and for certain oducts, so far not specified, in nformity with General Agreent on Tariffs and Trade rules. The ministers also agreed that e fund pay premiums of a maxim $500 per hectare for grubbing old apple, pear or peach hards.

lo ceiling has been set for total ts of the fruit and vegetables icy, although earlier a ceiling $60 million annually had been eed upon.

Price of Gold Slumps; Finds Some Support

Fall Said to Be Halted By Technical Factors

LONDON, Nov. 25 (Special).—The price of gold on the free market continued to ease today, but some technical reaction to the low level halted the run-down late today.

At the morning fixing here, the price dropped to another new low at $35.35 an ounce.

Bullion dealers said there were still sizable amounts of the metal being offered, but trading was quiet. There were signs that gold operators were becoming more cautious as the free price approached the central bank rate of $35 an ounce, and were not wholly prepared to liquidate their holdings at that level, they said.

The price climbed back up 10 cents at the afternoon fixing to $35.45 an ounce but there was no sign of any concerted buying, dealers said.

Some bullion dealers said this morning that demand from consumer and industrial users was growing a bit at present price levels.

The market overall, however, remains dominated by the question of central banks' action if the free price moves down to $35 or below, they said.

Some dealers said they expect the price to drop below $35 and one noted that even if the United States does finally agree to some sort of central bank support action, the price will still drop to around $34.80 or $34.90 to take account of commission, transport and insurance rates as gold is exchanged against dollars.

Zurich Price Down

ZURICH, Nov. 25 (AP).—The gold price opened at another all-time low of $35.30-$35.50 an ounce here today, but firmed a bit later to close at $35.45.

Banking sources here said, however, that a significant drop below the official $35 price was not likely to take place on the free market.

They explained that as soon as the price hit $34.80 an ounce—the so-called "shipping point"—central banks of some smaller countries were certain to buy on the free market to increase their own gold reserves, and these purchases would automatically push the price up again.

Chemical Bank and Anti-Loan Ads

By Martin Rossman

LOS ANGELES, Nov. 25.—New York's Chemical Bank, whose $9 billion in assets make it the nation's sixth largest bank, is advertising for less business.

It wants to persuade its customers to go away—well, some of its loan customers, at least.

"You can help by not borrowing money when you really don't have to," it is saying—in print and on the air.

The bank is in the midst of a three-week, "high impact" campaign prompted, according to Edward Peguillan, vice-president in charge of advertising, "by a deep-seated feeling on the part of management that the consumer is not conscious of the causes of inflation and what steps could be taken to help curtail the inflationary spiral."

Says Alvin Hampel, executive vice-president and director of creative services for Chemical Bank's advertising agency, Benton & Bowles:

"The banks have been taking the rap for high interest rates. In an effort to dispel this, they [Chemical management] took it upon themselves to tell their story."

The objective of the campaign, Mr. Hampel says, "is to put the blame where it belongs and at the same time to discourage people from unnecessary spending and borrowing."

Judging by full-page ads and 90-second commercials being run in the New York market, "the blame" lies with all of us.

The headline in the print ads, beneath a drawing of what appears to be an infernal inflation machine, reads: "We're as caught up as you in the vicious circle of inflation."

A small legend in the corner of the ad details the "vicious circle" this way: "Wages go up. Prices go up. Wages up. Prices up. And with prices going up, people tend to borrow now to buy things for fear that prices will go even higher in the future."

The commercials contain the sobering message: " . . . Because of inflation, no matter what you earn, salary raises alone over the past ten years have probably got you nowhere . . ."

The final scene in the commercial is a bum advancing on the camera, hand outstretched, saying: "Hey, buddy . . . you got $6.25 for a cup of coffee?"

While the $250,000 campaign is earmarked to run for only three weeks, its success will be evaluated upon its conclusion "and it could be implemented instantly if management wants to continue," Mr. Peguillan says.

Well, then, how is it going?

"We've had very fine reaction almost unanimously," he says. "Compliments have been coming in by phone and letter, from both businessmen and consumers. Many of them thanked us for being candid on a difficult question."

Allied Stores Profits Down; Sales Are Up

NEW YORK, Nov. 25 (Reuters).—Allied Stores showed a 7 percent drop in earnings in the third quarter of the year, and an 8 percent drop for the first nine months of the year as sales for both periods edged up.

Third-quarter net was $2.68 million, or 31 cents a share, compared with $2.89 million, 34 cents a share, a year ago. Sales rose to $283.6 million from $274.9 million.

Nine-month net was $4.55 million, 50 cents a share, compared with $4.93 million, 56 cents a share, on sales of $787.1 million, up from $772 million.

Plague of Security 'Losses' Runs to $45 Million and Up

By Robert J. Cole

NEW YORK, Nov. 25 (NYT).—The "mysterious disappearance" of securities at banks and brokerage houses in Wall Street this year was estimated yesterday at nearly $45 million amid strong indications that the figure might run even higher.

Frank G. Zarb, chairman of an industry-wide committee to fight securities thefts, estimated that such losses this year of New York Stock Exchange member firms alone would probably equal the year-earlier level of $23 million. The level in 1967 was $11 million.

New York banks, he added, have also experienced "substantial" losses. Within the last 12 weeks, he said, close to $30 million in government bonds was reported missing by three major ones.

Mr. Zarb was referring to a $13.-19 million loss at Morgan Guaranty Trust Co. a $2.1 million one at Marine Midland Grace Trust Co. and a $1.6 million one at Chase Manhattan Bank.

The industry spokesman, who is chairman of the joint banking securities industry committee on securities protection, noted that there had been a "marked increase" in mail thefts involving securities and there had also been a number of home and office burglaries involving stock and bond certificates.

Mr. Zarb said that almost any estimate of the extent of securities thefts could be made without fear of contradiction because no one knows the extent of the loss.

"Stealing is not the only way to obtain profit via the underworld stock exchange," he said. For example, he noted the Manhattan district attorney's office recently recovered several million dollars in counterfeit bonds.

As a start in alleviating the problem, he urged more careful screening of personnel and good management control. He also called for a massive education program among loan officers, trust officers and registered representatives.

Dow Nears Year's Low

Rally Fizzles, Prices Drop As Tax Selling Cited in N.Y.

By Vartanig G. Vartan

NEW YORK, Nov. 25 (NYT).—The New York Stock Exchange took another tumble yesterday after a rally attempt at mid-session failed to bring in buying support.

For the 12th straight session, declines ran ahead of advances. The final reading was 741 declines to 581 advances, although gainers had outpaced losers by a better than 7-to-5 ratio at noon.

Factors continuing to weigh down stock prices were tight credit and the administration's repeated pledges not to ease its policy of fiscal and monetary restraint "too soon" in the battle against inflation.

The pressure of tax selling also trimmed prices for many issues.

"Tax losses will count more this year than in 1970," noted Eldon A. Grimm, senior vice-president of Walston & Co. "Many people are electing to take a tax loss this year, because any gain would be inflated by the 10 percent income tax surcharge expiring at the end of December."

Walt Disney Productions, climbing 5 1/2 to 120, was the market's largest point gainer. It traded as high as 126 and was one of four issues making new yearly highs, against a total of 127 new lows.

Meanwhile, such corporate giants as Du Pont, down 1 1/8 to 108 7/8, and Union Oil of California, off 1 1/2 to 39 1/8, sagged to new yearly lows.

The Dow Jones industrial average plunged 5.61 to 807.29. This came on the heels of yesterday's decline of 10.23 points and a loss amounting to 26.13 last week.

It means, furthermore, that the market's most closely-watched indicator is now hovering within striking distance of this year's closing low of 801.96 on July 29.

Steady Fall

The Dow industrials have been falling almost steadily since cresting on Nov. 10 at 863.05, their best closing level since early July. But even on that day the declines ran slightly ahead of advances.

Utility averages also continued to slip while the Dow Jones railroad average, down 1.40 to 187.01, has declined to its lowest reading since October, 1966.

On Wall Street, numerous analysts described the market's technical condition as "oversold." Prior to yesterday, the breadth of the market, an important indicator, had averaged more than 900 declines daily in the last 11 sessions.

One analyst stated, "A technical rally is overdue." Another said: "General bearishness is so thick you can almost cut it with a knife."

Falconbridge Raises Prices

TORONTO, Nov. 25 (Reuters).—Falconbridge Nickel Mines Ltd. said today it is increasing the base price of nickel by 25 cents to $1.28 a pound, effective immediately.

This follows a similar 24 percent increase yesterday by International Nickel Co., the world's largest nickel producer.

Falconbridge also said it plans to more than double capacity by 1973 at a cost of about $300 million. The company said total industry capacity will have to rise by 50 percent if a balance between supply and demand for nickel is to be achieved.

Falconbridge said it followed the Inco price boost because additional funds were needed to finance its new exploration and production.

Pollution control costs and expenses in the company's recent labor settlement following the four-month Canadian nickel strike were other reasons cited for the price hike.

Cominco Price Hike

MONTREAL, Nov. 25 (Reuters).—Cominco Ltd. said today it is increasing its lead price in Canada by 0.5 cent to 16 cents (Canadian) a pound.

This follows similar moves yesterday by leading U.S. producers.

U.S. Steel Prices

PITTSBURGH, Nov. 25 (Reuters).—U.S. Steel Corp. said tonight it will adjust the prices of a broad range of products, effective Dec. 15, to reflect the "24 percent increase in nickel prices."

The firm said it would also make adjustments for recent price increases in aluminum, molybdenum, copper, cobalt, and zirconium.

Nixon Urges Hike in Loans From Export-Import Bank

By Edwin L. Dale Jr.

WASHINGTON, Nov. 25 (NYT).—President Nixon has asked Congress to authorize an increase of $853 million in the lending activity of the Export-Import Bank in this fiscal year.

Under the budget amendment, lending by the bank could total $3 billion instead of the $2.147 billion originally decided upon in January. The aim is to increase U.S. exports and thus improve the nation's balance of payments.

In addition, the President asked for an increase in the bank's authorized guarantee and insurance activities to $2 billion from $1.783 billion.

The change is one of the rare cases in which a government agency has been permitted to spend more than originally planned in the budget submitted by former President Johnson.

The bulk of the rise in net lending will stem from the increased lending authority requested yesterday, assuming Congress approves. An exact estimate of the impact in fiscal 1970, the current year, is not possible.

The bank itself expects to use about $400 million of the expanded authority to triple its program of discount loans. These are loans to banks on the security of export paper, aimed at enabling the banks—hard-pressed for funds—to continue financing exports in the face of competing demands.

IMF Confirms German Drawing

ASHINGTON, Nov. 25 (UPI). Vest Germany has drawn the *ivalent of $540 million in seven* rencies from the International netary Fund, the fund conned today.

he currencies include $20 mil- worth of Belgian francs, $60 million of Canadian dollars, $55 million of Italian lire, $80 million *of Japanese yen*, $40 million of Dutch guilders, $25 million of South African rand, and $260 million of U.S. currency, the IMF said.

"The purchase by Germany... restores the fund's holdings of deutsche marks to the level of Germany's currency subscription," the IMF added. Germany's quota in the fund is $1.3 billion.

The withdrawal is to strengthen Germany's liquid currency holdings depleted by an outflow of funds following the revaluation of the mark last month.

rench Merger Code

ARIS, Nov. 25.—The Finance istry says it will draw up joint- with the bourse commission and stock brokers association a new e of conduct for public take- r offerings.

U.S. Questions Armour Takeover

WASHINGTON, Nov. 25 (NYT).—The government threatened court action yesterday to prevent Greyhound Corp. from acquiring controlling interest in Armour & Co.

In a terse announcement, the Justice Department said Greyhound and General Host Corp., which had planned to sell the Armour stock, had been informed the purchase would be considered illegal.

It claimed the purchase would violate a 1930 consent decree under which certain meat packers were barred from directly or indirectly dealing in some commodities.

Greyhound, a conglomerate formed around the huge transportation interests, deals in some commodities that would be affected under the decree, the government said.

The action marked the second time Justice had raised the 1930 decree in an effort to thwart the takeover of Armour. The issue was also raised against General Host.

But Harry J. Ashton, president of General Host, said "I'm confident that Greyhound will resolve this problem."

French-Algerian Talks Start on Oil Agreement

PARIS, Nov. 25 (Reuters).—Talks between the French and Algerian governments on taxation revision under their 1965 oil agreement opened yesterday in Algiers, according to informed sources here. Algerian authorities are believed to be concerned by the comparative lack of productivity in relation to the level of French investment in Algeria.

New Zealand Oil Find Confirmed

AUCKLAND, New Zealand, Nov. 25 (NYT).—The consortium drilling for oil off the coast here confirmed today the presence of hydrocarbons in its Maui 2 well 24 miles off the township of Opunake on the west coast of North Island.

A wave of speculation has swept stock exchanges in the last week in anticipation of an announcement. Oil was found in March in Maui I well nine miles farther out to sea.

The drilling consortium—Shell, British Petroleum and Todd Oil Services—said it would take three to five years to begin production if the field proved to be commercial.

U.S. Auto Sales Picture Is Mixed

DETROIT, Nov. 25 (NYT).—Chrysler Corp. mid-November new car sales ran slightly ahead of last year's levels, but sales at Ford Motor and American Motors trailed 1968, the three companies reported yesterday.

General Motors, accounting for half the U.S. market, said today its dealers sold 137,007 passenger cars in the Nov. 11-20 period, down from 153,138 a year ago.

Chrysler dealers delivered 50,302 American-made cars in the Nov. 11-20 period, a record for mid-November and up from 5$,211 a year ago. Sales for the year to late total 1.29 million units, comppared with 1.38 million a year ago.

Ford sold 75,847, down 3 percent from 78,006 a year before. American Motors, which resumed production yesterday after a month-long strike retailed 4,551 cars in the period, down from 7,547 a year ago.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

DIRECTOR-DATA PROCESSING
SWITZERLAND
$30,000

A major international corporation is seeking a Director of Data Processing for its international head office in Switzerland. The company is a leader in its field and has substantial manufacturing operations and a worldwide distribution organization. The Director of Data Processing will be responsible for implementing and up-dating the management information system of the worldwide organization. The opportunities for further advancement within the company are excellent.

This executive should have a strong background of experience in data processing, procedures and systems, and be able to establish and administer an integrated operating system. A University Degree would be an advantage, as would experience in the United States and familiarity with American business systems. Ideally, he will be of Swiss nationality but otherwise qualified candidates will be carefully considered. Fluency in English and German is desirable, and the executive's present position, qualifications and current earnings should entitle him to command a salary of up to $30,000 annually.

Qualified executives are invited to write to us giving full information regarding academic background, experience, current position and responsibility, present earnings, languages and home address and telephone number.

All replies will be treated in the strictest confidence and, as management consultants retained to select the executive for this position, we undertake not to submit any information communicated to us to our client without the prior consent of the respondent and after a personal interview.

Box D 1,558, Herald Tribune, Paris.

GENERAL MANAGER
INDUSTRIAL
$30,000

A large American corporation with worldwide operations in the industrial field seeks a General Manager for its Italian subsidiary. This man will have the responsibility of motivating the present organization and putting the company into a dynamic growth position. This is an outstanding opportunity for an ambitious executive, skilled in building and motivating an organization. He must be sensitive to the importance of human relations, marketing oriented, highly experienced in modern management techniques and both ready and eager for greater opportunities and responsibilities.

Ideally, this man will be of Italian nationality or background, 35 to 45 years of age, a University graduate, preferably with an engineering degree. He must be fluent in English and Italian, and experience in general management with an industrial manufacturing operation would be most desirable.

His current position, qualifications and earnings must be at a level that would entitle him to command total remuneration of up to $30,000.

Write in confidence, giving full information on academic background, business experience, current earnings and home address and telephone number.

As a leading international firm of management consultants retained by our client to select this executive, we undertake that no information will be released without prior consent after a personal interview.

All replies to: Box D 1,545, Herald Tribune, Paris.

MANAGER
JAPAN

The branch-office of Tokyo of a leading Swiss commercial company, representative of important European trusts, is developing itself very strongly.

A businessman with experience in the machinery industry or an engineer in the machinery field with commercial experience, able to assume with competency the general management, is therefore required.

This situation requires commercial experience in Japan, successful practice in the marketing field, talent for organization and skill in directing a large staff of commercial and technical collaborators.

The position is remunerated according to its importance and its responsibility.

Dynamic personalities are invited to send their offers, together with the usual documents and a handwritten letter under reference HT 684, to:

Dr. H. Schwing, Dipl. Ing. ETH
Konsulent für Organisation und Personalfragen
Auf der Mauer 17, CH-8001 Zürich/Switzerland.
Phone: (051) 47 73 47.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. d—Declared or paid in 1969 plus stock dividend. e—Paid last year. f—Payable in stock during 1969, estimated cash value on ex-dividend or ex-distribution date. g—Declared or paid so far this year. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in 1968 plus stock dividend. t—Paid in stock during 1968, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BLONDIE

BRIDGE

By Alan Truscott

West led the heart seven, and South boldly finessed the queen. When the queen held, the declarer led the singleton diamond from dummy and East put up the ace. This was a desirable false card: the king would reveal East's possession of the ace, but the ace does not betray the possession of the king.

East shifted to a trump, and South won with the ace. South led the diamond jack and discarded a heart from dummy in the hope that West held the diamond king. However, East won with the king in this position:

NORTH
♠ 7
♡ A 10 5 4
◇ —
♣ A Q 9 7

WEST
♠ —
♡ K J 9
◇ 10 8
♣ K J 10 6

EAST
♠ J 8 6 2
♡ 8
◇ 5
♣ 6 5 2

SOUTH
♠ K Q 10 9
♡ —
◇ Q 9 7
♣ 4 3

East chose to return a heart, and South ruffed instead of discarding. He cashed the diamond queen and led the diamond seven, ruffing in dummy.

If East had overruffed and returned a trump, South would have finessed and drawn trumps. If East had overruffed and returned a club, South would have taken two club tricks in the dummy and played the heart ace, trapping East's three remaining trumps in a coup position.

To avoid suffering one of these fates, East refused to overruff, but it did not help him. He discarded a club, and South played the heart ace from dummy. This time East ruffed, South overruffed and cashed his remaining trump winners. Finally he led his established diamond, and East could do no more than make one trump trick.

NORTH
♠ 7 5
♡ A Q 10 5 4 3
◇ 4
♣ A Q 9 7

WEST
♠ 4
♡ K J 9 7
◇ 10 8 6 3
♣ K J 10 8

EAST
♠ J 8 6 3 2
♡ 8 6
◇ A K 5
♣ 6 5 2

SOUTH (D)
♠ A K Q 10 9
♡ 2
◇ Q J 9 7 2
♣ 4 3

Both sides were vulnerable.

The bidding:

South	West	North	East
1 ◇	Pass	1 ♡	Pass
1 ♠	Pass	2 ♣	Pass
2 ♠	Pass	3 ♠	Pass
4 ♠	Pass	Pass	Pass

West led the heart seven.

BOOKS

CASUALTIES OF WAR

By Daniel Lang. McGraw-Hill. 121 pp.

Reviewed by Ward Just

THE OCTOBER 18 issue of the New Yorker magazine is now something of a collector's item, for in its pages was a long account of an incident in South Vietnam. It was the story of a five-man reconnaissance patrol which, in November of 1966, abducted a young Vietnamese girl. Four men of that patrol raped her, then stabbed and shot her and left the body for lost. The fifth member of the patrol repeatedly attempted to bring his comrades to justice, and finally, with the help of an Army chaplain, succeeded. The four soldiers were court-martialed, and it is from the trial records and long interviews from the fifth man that Daniel Lang has assembled the story he calls "Casualties of War."

It is almost impossible to overpraise this book, which is the New Yorker article between hard covers. It is written so cleanly, with such extraordinary integrity, that one can only marvel at the fine sense of morality, intelligence and literary skill of the man who put it together. The pitfalls are everywhere—for sentimentality, for preaching, for pamphleteering, for all the other sins our journalism is heir to. Lang avoids all of them and proceeds to tell us quite simply about men who are made to live in a realm "outside civilization," which is to say men who are made to live in the middle of the war.

"Eriksson told me [Lang writes] that it seemed clear to him in retrospect that he should have been prepared for [the girl's] death. It had been preceded by any number of similar occurrences. In one form or another, he said, they took place almost daily, but he was slow, or reluctant, to perceive that they were as much a part of the war as shells and targets were. Eriksson now believes he should have foreseen that sooner or later one of these incidents was bound to strike him with special, climactic force. . . ."

Good for Morale

What struck him was the death of the girl, picked up on the first day of a four-day patrol, abducted from her house because her presence was "good for morale." Eriksson objects, but his objections are overruled. Later, he is made to guard the girl after she had been repeatedly raped, while the four others resume the patrol. He thinks he will permit her to escape, but he believes he will be killed by the others. Hoping somehow that the girl will escape anyway, young Eriksson is helpless when the four return and eventually kill her. Afraid for his own life but possessed of an obdurate sense of what is right and what is wrong, Eriksson then decides to tell his superiors what has happened. This section of t is nightmarish; no on to make trouble, to see staining the U.S. Army war effort.

But the men are br trial. The defense argu ly on the basis that th war on in South Viet the four accused men rated highly as soldie heavy. Sgt. Tony Me twice-decorated, someth hero; his superior gav "max" rating as squa Here is the exchange the company executiv and the prosecutor:

"Q.—Do you feel th place in the Unitec Army for murderers?

"A.—Sir, Sgt. Mes joined the unit in appr ly February of last y he served under me was a rifle-platoon lea the reason he is a ser day is because we put t of squad leader upon l

"Q.—I didn't ask y long elaboration. I sir ed, do you think a should be retained in th States Army? Yes or

"A.—Well, no. Si they've—not until th their sentence. Then, after rehabilitation— there's a difference, Sh

Are They Huma

There is so much this book, not least th sion of whether the soldier in Vietnam trul the Vietnamese, "the s human. If the girl Belgian, would she h abducted, raped and The attitude of these to the lives of Vietn casual to the point ference. In the court there were all manne forts to discredit E even, at one point, th tion by defense counse lacked a sense of hu not one of the boys.

No one reads Vietn any more. People are them, and tired of patches and the telev ments. Very well th look on this book as a book. Look on it a about war, and men one reason or ano caught up in it and casualties. Read it to special dread: "Woul the courage to do what did?"

This man Lang, wh as I know has never in South Vietnam, ha one of a handful (as of fact, no others come of books about this deserve to be called just about any other of praise that one can

Ohio State Drops to 4th in AP, 6th in UPI

exas Rated No. 1 in Both Polls

YORK, Nov. 25 (AP).— making a big gain without arrying the ball, took the sting among college football yesterday.

unbeaten Longhorns were st Saturday and benefitted Michigan's 24-12 upset of State, which ended the s' 23-game winning streak placed them atop the Asso- Press weekly rankings by riters and broadcasters.

s, 8-0 with two tough regu- son games to play, received 33 of 38 first-place votes. Ohio State, named No. 1 on 31 of 39 ballots a week ago, did not receive a single first-place vote and toppled to fourth place, behind Arkansas and Penn State.

The new leaders totaled 748 points, a margin of 145 over the Razorbacks, whom they'll meet in a Dec. 6 showdown for the Southwest Conference title after their traditional Thanksgiving Day clash with Texas A&M on Thursday.

Arkansas, also 8-0 and idle last week, held a 30-point edge over Orange Bowl-bound Penn State. The Nittany Lions picked up three of the remaining five first-place votes after lifting its record to 9-0 by trimming Pitt, 27-7.

Ohio State had 509 points, compared with 736 last week.

The other firsts went to No. 5 Southern California, 9-0-1 following a 14-12 victory over UCLA, and Michigan, 8-2, which soared from 12th place to seventh. The Trojans and Wolverines meet Jan. 1 in the Rose Bowl.

UPI Rates Buckeyes 6th

NEW YORK, Nov. 25 (UPI).—Ohio State fell all the way to sixth place in the coaches' poll taken by United Press International.

Texas, with 30 of the 35 first-place votes, was ranked first, ahead of Penn State, which had one first-place nod. Arkansas, second in the AP ratings, was third, followed by Southern California, which had three first-place votes.

Missouri, ranked sixth by AP, was No. 5, only 7 points ahead of Ohio State. The Tigers are 9-1 and meet Penn State in the Orange Bowl.

Ohio State had a 100-point lead over the seventh-ranked team, Louisiana State. The other first-place vote went to Nebraska, which still was ranked only 12th. The Huskers, who finished in a tie with Missouri for the Big Eight championship, are 8-2.

Owens Gets Heisman in Close Vote

Sooners' Runner Edges Phipps

NEW YORK, Nov. 25 (AP).—Steve Owens of Oklahoma, a record-setting ball-carrier in an age of passers, was named today winner of the 1969 Heisman Trophy, symbol of college football's outstanding football player.

The 6-2, 215-pound senior tailback from Miami, Okla., is the sport's top touchdown maker in history and has set a three-year career record for rushing.

In one of the closest competitions in years, Owens beat out such stars as Mike Phipps of Purdue, Rex Kern of Ohio State, Archie Manning of Mississippi and Jim Plunkett of Stanford, all quarterbacks. The award will be made Dec. 4 at the Downtown Athletic Club here.

With 21 touchdowns already this year, and a final game to play Saturday against Oklahoma State, the Sooner ace has a career total of 54 touchdowns, surpassing the record of 52 set by Army's Glenn Davis in 1944-46. With 3,806 rushing yards he has shattered the three-year mark of 2,675 set by Gayle Sayers of Kansas in 1963-64.

Owens gained 100 yards or more in 17 consecutive games before being held to 72 last Saturday by Nebraska. He is tied for the scoring lead with Mack Herron of Kansas State with 126 points and he ranks fourth among the major college rushers for the year with 1,216 yards in 303 plays. He needs 148 yards in his final game to overtake Ed Marinaro of Cornell, whose season is complete, for the rushing championship.

Owens, 21, received 1,488 points, and barely beat out Phipps, who had 1,334. Kern was third with 866 points in a poll of 992 electors. Manning was fourth, followed by a pair of defensive tackles, Mike Reid of Penn State and Mike McCoy of Notre Dame.

It marked the third time in four years that a Purdue player had barely been beaten out for the award. The others were Leroy Keyes and Bob Griese.

United Press International.

ALL ABOARD—Boston's Don Awrey (26) not only clobbered Eric Nesterenko of Chicago, but he managed to catch referee Vern Buffey as well.

Nagy of Red Sox Is 2d

Royals' Piniella Picked AL Rookie of the Year

NEW YORK, Nov. 25 (AP).—Lou Piniella, a Seattle expansion draftee who was traded to Kansas City April 1, was named American League Rookie of the Year today by a 24-man panel of the Baseball Writers' Association of America.

Piniella received nine votes and Mike Nagy, a Boston pitcher, received six.

Carlos May, the Chicago White Sox outfielder who suffered an accident while on training maneuvers with the Marine Corps in August, was third with five votes. The California Angels' Ken Tatum, a relief pitcher, was fourth with four votes.

In the rookie-of-the-year balloting the voting is only for first place and consequently there is no point score as in the Most Valuable Player tabulation. Only regular-season performances are considered.

Piniella, a 26-year-old outfielder, batted .282 with 21 doubles, six triples, 11 homers and 68 runs batted in. He led the expansion Royals in hitting.

Nagy, a New Yorker who attended Manhattan Community College, turned in a 12-2 record for the Red Sox. The 21-year-old right-hander started 28 games and pitched seven complete games, compiling a 3.11 earned run average. He was the third highest winner on the staff.

May, an early favorite to win the award, had slugged 18 homers and driven in 62 runs while batting .231 in 100 games before he entered the Marines. An explosion resulted in the loss of a portion of his right thumb. Although he missed the rest of the year, he is hopeful of resuming his career next spring. Carlos, 21, is the brother of Lee May, Cincinnati's first baseman.

Cards Reobtain Willis

ST. LOUIS, Nov. 25 (UPI).—Ron Willis, a right-handed relief pitcher, has been reacquired by the St. Louis Cardinals from the Houston Astros. Willis was assigned to the Card farm at Tulsa last season and was sold conditionally to the Houston organization. The Cards repurchased Willis's contract and again have assigned him to Tulsa.

Pro Football Roundup

njured Starr May Not Play Again

y William N. Wallace

7 YORK, Nov. 25 (NYT).— Starr, the Green Bay quark, has a separated right er and may not play anythis season or ever. The 35-ld Starr was hurt in the quarter of Sunday's losing against Detroit when tackled running for a six-yard gain. Horn was his replacement. r has indicated that this ign, his 14th in pro footill be his last. The Packers four games left.

'll have a look at it (Starr's) on a week-to-week basis," oach Phil Bengston.

re are other casualties. Alex s, the Lion all-pro defensive , hurt a knee in the Packer and it is doubtful that he lay against Minnesota in Deon Thursday, Thanksgiving

The Denver Broncos probably have to go with Pete Liske r than the regular, Steve l, at quarterback against sas City, also on Thursday. l has a severely bruised chest. andy Johnson, the Atlanta quarterback, has undergone surgery for torn knee ligaments and is through for the year. This leaves the Falcons with one quarterback, Bruce Lemmerman.

Brian Piccolo, the Bears' halfback, is in a hospital here undergoing tests to clear a persistent cough. The Bears refused to say which hospital.

The Vikings are favored by 8 points in the Detroit game. But the Lions have won four straight with their new quarterback, Greg Landry, and are just two games behind Minnesota in the Central Division standing.

"Landry is a winner," said Joe Schimdt, the Lion coach. "He's won five out of six and he'll get better." Forgotten is Bill Munson, whose injury gave Landry a second-year pro from Massachusetts, his chance.

But Minnesota is formidable, "a better football team in every way" than Baltimore last year, according to Chuck Noll, the former Colt assistant, now the Pittsburgh head coach. "They have a belief in themselves, pride, extra effort and momentum," said Noll, who saw the Vikings up close as they beat the Steelers, 52-14.

Monday's Results

Cincinnati 129 (Van Arsdale 29, Dierking 25), Milwaukee 104 (Alcindor, Arthur, McGlocklin 13).

San Diego 112 (Block 32, Hayes 22), Seattle 105 (Wilkens 23, Snyder 21).

That Old College Try

TAMPA, Fla., Nov. 25 (AP).—Defensive tackles Calvin Ellison Trasell Grey of California State at Los Angeles decided that game last Saturday night against the University of Tampa ld be too difficult to win. So they told coach Walt Thurd that they would not play.

Team officials said both players were put on an airplane to Los Angeles before the game. A spokesman said they ld not be graduated until they repay the school for their e fare.

Once-beaten Tampa trampled the Diablos, 53-0.

In losing its eighth game in eight, L.A. State had one scoropportunity. That came in the final two minutes when ulties gave the Diablos six tries at the goal from the 1-yard Tampa's defense held.

Rash of Injuries to NBA Stars Is Laid to Fatiguing Defenses

By Sam Goldaper

NEW YORK, Nov. 25 (NYT).—The toll of injuries in the National Basketball Association, perhaps greater than at any other time in the 24-year history of the league, continues to mount, especially among players with superstar ratings.

Saturday night in San Francisco, Jerry Lucas of the Warriors was the latest standout to join the injury list. The 29-year-old Lucas broke two small bones in the back of his left hand while his team bowed to the Los Angeles Lakers, 106-98.

Lucas, who will be out for perhaps six weeks, was traded last month by Cincinnati for Jim King and Bill Turner. Soon after King joined the Royals, he suffered a broken leg.

Basketball people have had varying theories for the injuries. Some believe conditioning has been poor. But most of those questioned split their thinking between mere coincidence and the prevalence of pressing defenses, which tire the players, especially those with the longer playing times.

The rash of injuries so early in the season may be the determining factor in the playoff structure next March. At least six of the 14 teams in the league have been set back by key injuries, with the Lakers leading the parade.

A Shortage Problem

The Lakers' coach, Joe Mullaney, is wondering how he possibly might meet the league rule of dressing at least eight players. When the game ended in San Francisco Saturday night, he had six men available for duty.

The Lakers, a good subject for any of the television medical series, started having injury problems when Wilt Chamberlain underwent knee surgery. To add to Mullaney's problems, Elgin Baylor missed the last three games with a groin injury.

Similar injuries have sidelined Johnny Egan for four games and Keith Erickson for two. In addition, Rick Roberson, the rookie who replaced Chamberlain at center, re-injured his left ankle, and had to leave Saturday night's game at half-time.

The Philadelphia 76ers, expected to be one of the top teams in the Eastern Division, have tumbled in the standing, hurt by the unavailability of Luke Jackson until Saturday night. Jackson has had a slow recovery from an Achilles tendon operation.

The Detroit Pistons are playing without their top scorer, Dave Bing, and at times without Jimmy Walker and Otto Moore. Baltimore misses Kevin Loughery, who has a torn ankle tendon; Al Attles of San Francisco broke a hand and Don Kojis of San Diego is a night-to-night starter because of ankle injury.

Police Charge Green, Maki for Hockey Brawl

By Gerald Eskenazi

NEW YORK, Nov. 25 (NYT).—In the long history of the National Hockey League there never has been a complaint issued by the police to players involved in brawls. According to the commissioners of basketball, baseball and football reached yesterday there haven't been any in their sports, either. There have been private suits brought by one player against another, but never by a civilian authority.

But yesterday Clarence Campbell, the NHL's president (who was an esteemed lawyer) consulted with the league's counsel over the summonses that have been issued by the Ottawa police to Ted Green of Boston and Wayne Maki of St. Louis.

Green was hit on the head with a stick by Maki in an exhibition game on Sept. 21 (in a bout that observers say was started by the Boston strong boy). Neither issued a complaint.

The summonses are returnable in Ottawa on Dec. 18—ironically, on a day when the Blues and Bruins are scheduled to play at St. Louis.

'Civil Law Prevails'

On police action taken against players who fight in an athletic contest, Campbell said:

"Being a lawyer, I've always taken the position that civil law prevails. The authorities have jurisdiction if they choose to exercise it."

Campbell said that Green and Maki had been charged with "assault occasioning bodily harm." If they answer the summonses they can elect either a summary trial before a magistrate or a preliminary hearing. If they fail to appear, they will be liable to arrest. If prosecuted and found guilty, each faces a maximum of two years in prison.

"All bodily contact sports include assaults of varying degrees," said Campbell, who was surprised by the summonses. He had been led to believe by the authorities in Ottawa that no formal charges would be made.

He fined each player $300, suspended Maki for 30 days and Green for 13 games (to become effective if and when Green, who suffered a skull fracture, returned).

Bowie Kuhn, the baseball commissioner—who is a lawyer—thought "it would have to be an extremely flagrant case" to warrant criminal action. "A certain amount of intentional contact is permitted in all sports," he said.

"At what stage do you intervene with civil authorities and when don't you?" Campbell asked. "So long as the game of hockey is kept within the bounds proscribed by society, do you send a policeman to every game?"

The Scoreboard

TENNIS—At Stockholm, two of the five seeded players in the Stockholm men's indoor championships were knocked out in the first round by unseeded Americans. Charlie Pasarell, beat third-seeded Australian Roy Emerson, 3-6, 6-3, 7-5, and Earl Buchholz beat fifth-seeded Cliff Drysdale of South Africa, 7-5, 6-2. Top-seeded Rod Laver dropped the first set, 3-6, against 18-year-old Swede Leif Johansson, but then won the next two, 6-3, 6-1, to take the match. In other first-round matches, Ray Moore (South Africa) d. B. Folke (Sweden), 7-5, 8-6; Ron Holmberg (U.S.) d. B. Andersson (Sweden), 3-6, 6-3, 6-1.

YACHTING—At Buenos Aires, Thomas Allen and Bruce Goldsmith of the United States finished 1.2 for the second straight race of the world Lightning Class championships. Allen, three times world champion, has a 3-point lead in the overall standings over Goldsmith.

AUTO RACING—At Fuji, Japan, Inoru Kawai of Japan, driving a Japanese-made Toyota Seven, held off a challenge from nine foreign drivers to capture the $65,000 World Challenge Cup race. Kawai finished the 75-lap, 200-mile (320-kilometer) race ahead of Britain's John Cannon, who was driving a seven-liter Ford. German-born Lother Motschenbacher of Bevarly Hills, Cal., finished third.

BOXING—At New York, Carlos Ortiz shed the rust of age and a 17-month layoff to win a majority ten round decision over Brazilian Edmundo Leite and thus became a welterweight contender. The 33-year-old Puerto Rican had retired after losing his lightweight crown to Teo Cruz in June, 1968.

At Rome, unbeaten Spanish heavyweight José Manuel (Urtain) Ibar scored his 22d consecutive knockout victory in 1:40 minutes of the first round over George Holden of Medford, Mass.

BILLIARDS—At Linz, Austria, Belgium's Raymond Ceulemans won the 17th world three-cushion championship. He scored 12,178 points to beat Jean Marty (France), who had 12,144 points. Jose Galvez of Spain was third and Osvaldo Berardi of Argentina, fourth.

WEIGHT-LIFTING—At Graefenrods, East Germany, G. Ivanschenkov of the Soviet Union broke the world record for the Olympic triple weight-lifting event in the light-heavyweight class with a total of 492.5 kilograms (1,086 pounds). Ivanschenkov's individual performances were: snatch—160 kilograms (353 pounds), press—145 kilograms (320 pounds), and jerk—187.5 kilograms (413 pounds). The former record of 490 kilograms (1,080 pounds) was held by Golubovitsch of Russia.

At Skien, Norway, Hans Bettemburg, a German-born Swedish citizen, set a world light-heavy weight record in the press category with 171.5 kilograms (377 pounds). Bettemburg bettered his own record of 171.0 kilograms (376 pounds).

D—*ndgren Wins NCAA Cross-Country Title*

By Michael Strauss

V YORK, Nov. 25 (NYT).— Lindgren, the Washington harrier for whom winning al Collegiate Athletic Asso- titles seems to com: naturcaptured No. 11 yesterday st some extremely talented bespectacled senior, making his farewell apparance as a collegian, turned in a record performance against a field of 274 in the 31st NCAA cross-country championships at Van Cortlandt Park in the Bronx. He won by a dozen yards in 28 minutes 59.2 seconds over a six-mile course.

Mike Ryan, the defending champion from the Air Force Academy, was a fast-finishing second. Then came Steve Prefontaine, the freshman from Oregon; John Badnarski, a 20-year-old Englishman from the University of Texas at El Paso, and Art Dulong, the IC4-A champion from Holy Cross.

Lindgren's victory came as no surprise. The Cougar ace won the same crown as a sophomore and junior, but was idled last year with a stomach disorder, thereby retaining his eligibility.

Lindgren also has won eight NCAA track titles at two, three and six miles. His time yesterday bettered the course record set by Ryan last year by 17.6 seconds. Ryan (29:01) and Prefontaine (29:12) also topped the 1968 mark of 29:16.8.

Fanned On

A spectator about a mile from the finish was instrumental in the victory. Lindgren provided the explanation.

"I started my kick earlier than I had planned," he said. "It was when I was coming out of the hills on the way to the flats. Someone yelled, 'Here comes Ryan.' So, I speeded it up in order not to be caught.

"Boy, was I glad to win this one. My glasses fogged up and my right foot came up with a blister. Talk about having problems."

Three Australians and a Briton figured prominently in the upset team victory by Texas-El Paso. Besides Bednarski's fourth-place finish, Matt Breen, one of the three Australians, was 18th, followed by Bob Walczak, also from Australia, who was 42d.

Kerry Pearce of Australia, the leading member of the squad, became ill yesterday morning and finished 69th. Villanova, which was trying for its fourth straight crown, had to settle for second place. Villanova's best finish, by Conald Walsh, a sophomore from Ireland, was 11th.

Poincelet Retiring

PARIS, Nov. 25 (UPI).—Roger Poincelet, one of Frances most successful jockeys, is retiring at the age of 48 to become a trainer. Poincelet, who has ridden about 3,000 winners in a career spanning nearly 35 years, began as an apprentice at the age of 13. He won the Prix de l'Arc de Triomphe three times—in 1949, 1952 and 1964.

Clay Schedules Benefit Fight

TULSA, Okla., Nov. 25 (UPI).—Cassius Clay will fight an exhibition match here early in January against an opponent to be named laetr.

Two Tulsa businessmen made the announcement after promoters had been unsuccessful in getting permission to stage the bout in Oklahoma City. The Oklahoma City Council rejected the request, saying it would not condone the fight because of Clay's 1967 conviction for refusing to be inducted into the Army.

The fight will be held on the ranch of Gene Hopkins, president of Labarge, Inc., an electronics company. Hopkins said he would be paid $60,000 for the fight, which will be shown on closed circuit television nationwide, in Canada and five foreign countries.

Hopkins said the money would go to a Tulsa retarded children's organization.

"I don't agree with Clay's political views," Hopkins said, "but it would seem to be a money-making deal for the children."

ABA Result

Monday Night

New Orleans 81 (E. Jones 28, J. Jones 20), Dallas 78 (J. Beasly 23, Powell 17).

Royals Hold Lew To 13 Points

NEW YORK, Nov. 25 (AP).—Cincinnati's rugged defense, led by Connie Dierking, held Lew Alcindor to a career low of 13 points last night as the Royals routed the Milwaukee Bucks, 129-104.

The 7-foot-2 former UCLA star was relegated to the bench for prolonged periods and didn't score in either the second or fourth quarters of the National Basketball Association game. Royal coach Bob Cousy, who has been restored to playing eligibility, sat out the game.

Rockets 112, Supersonics 105

John Block made a pair of free throws with two minutes left to break a 100-100 tie and lead San Diego to a 112-105 victory over Seattle for the Rockets' seventh victory in nine games.

Margaret Court Un-Retires Again

MELBOURNE, Nov. 25 (AP).—Former Wimbledon champion Margaret Court of Australia has called off her second tennis retirement and announced tonight she would not only play on this year's Australian grass-court circuit, but would appear at Wimbledon again.

"I'll just fade out gradually, playing fewer and fewer tournaments," she said. Mrs. Court announced in January that this year's Wimbledon would be her last. She said tonight, "I have never played better in my life and my husband Barry and I decided that I should compete again this year."

Matt Is Injured

CERVINIA, Italy, Nov. 25 (AP).—Alfred Matt of Austria, who won a bronze ski medal at the Olympic Games at Grenoble, fell today during a training session here and fractured his right leg. Dr. Orest Maquignaz said the 22-year-old skier would not recover before 90 days.

Observer

On the Stand

By Russell Baker

WASHINGTON—"This is the semiannual bias-and-prejudice review of columnist/commentator 307-13-5432, as authorized under federal regulations and required for renewal of aforesaid columnist/commentator's license to engage in public dissemination of opinion. We will begin as usual with confession of bias. The columnist/commentator 307-13-5432 will admit freely to all biases, knowledge of which may be essential for the public to discount his writings for claptrap, softness on assorted isms and distortion of presidential utterances and government press releases. Speak."

"Thank you, sir. I am strongly biased in favor of women, the Rocky Mountains, New York sirloin, summer vacations, Jack Daniel, Groucho Marx, the Parthenon, blackberry jam, Thomas Jefferson, Leo Tolstoi, Ludwig van Beethoven, hybrid tea roses and miniskirts."

"Enough of this piffle, columnist commentator 307-13-5432. We're interested in how your mind works, in your personal prejudices."

"I have a mindless prejudice, Sir, in favor of the Berkshire Hills, and another, almost as intense, in favor of northern California."

"Aha, northern California. You are biased in favor of redwood trees. Does that indicate a prejudice against Ronald Reagan?"

"I'm ambivalent on Reagan. I have a senseless prejudice against pompadour hair styles on men, and an inexplicable passion for Reagan's hospital-bed scene as George Gipp in 'Knute Rockne—All-American'. I am, as you suspect, soft on redwoods, as well as oaks, elms and all trees in Florida that are festooned with Spanish moss. The eucalyptus bores me. I have a positive antipathy to palm trees and I dislike coconuts."

"You are trying to weasel out of the main thrust of this inquiry. You know very well what we are interested in—your prejudices about the government."

"I admit to prejudices against the government. I have an irrational dislike for its coins, because they are no longer pure silver. I am biased against its tax law. I have a senseless dislike for people who say 'thrust,' people who tap my telephone and people who keep *secret files on me*."

"Let's get down to cases, columnist commentator 307-13-5432. There are a lot of things—American things—that you secretly dislike, aren't there?"

"I admit it. I think American postage stamps are terrible. So is the Post Office. I am biased against American wine."

"Are there any American things you like?"

"Many. I am distinctly prejudiced in favor of the American League. 'An American Tragedy,' by Theodore Dreiser, 'An American in Paris,' by George Gershwin and 'The American,' by Henry James, not to mention Glenn Miller's arrangement of 'American Patrol'."

"We're not here to review your cultural tastes, commentator/columnist. We want to know your prejudices about the American system. What is your bias about politics? Stop fencing with us and answer the question: 'Are you biased against President Nixon?'"

"I am strongly prejudiced in favor of the President Nixon who is going to bring us together again and powerfully biased against the President Nixon who is trying to drive us apart. I am biased in favor of the President Nixon who said he had a plan for ending the war in Vietnam, and prejudiced against the President Nixon who won't put the plan into effect. It depends, you see, on which President Nixon you are inquiring about."

"Do you support the President's position on Vietnam?"

"Do you refer to the position outlined in his Nov. 3 speech in which he urged all of us to unite and buckle down behind him and get on with the job of not winning the war?"

"You could lose your license, you know, for refusing to respond to this board."

"I'm biased against licensing, as well as getting on with the job of not winning the war. Would you please now stamp my mind 'approved by U. S. government'? I feel an opinion coming on."

"Comforting to have a batch of happy and manageable people on hand..."

CHEERS

A Presidential Cast for Visitors

By Mike Causey

WASHINGTON (WP). — Hollywood, Rome and all the other film capitals of the world have nothing on Washington, D.C., when it comes to the fine art of crowd scenes.

Even in his wildest dreams, Cecil B. DeMille could never have hoped to summon the vast army of extras from central casting that are available—for free—to the President of the United States.

When a visiting dignitary is about to arrive at the White House Mr. Nixon (like every president before him) finds comforting to have a batch of well-dressed, happy and manageable people on hand to wave the appropriate flags, and go away at the appropriate time. He's got about 300,000 to choose from here, more than can be stuffed into the White House grounds.

This audience of usually willing extras is especially helpful when the foreign visitor is the sort that doesn't readily draw a crowd, or can only be guaranteed to produce a handful of disenchanted students, foreign and domestic, to protest something he's done or hasn't done.

This is how it goes:

A White House official (who doubles as a casting director) will call a federal agency and ask for X number of bodies at a certain hour. The employees are usually asked if they'd like to go, but on occasion workers are pressed into service.

A government bus, sometimes supplied by the military, picks them up at their agency. To avoid repetition before the TV cameras, the crowd scene duties are rotated among agencies. Different agencies get the call, depending upon the man they are supposed to cheer.

Bearded, Bell-Bottomed Types

For a swinger like Canada's bachelor Prime Minister Pierre Trudeau, bearded, bell-bottomed and attractive types from the Peace Corps or Office of Economic Opportunity might be asked to attend. A sprinkling of more dignified State Department types will be added, to give the group body.

For a land-reforming king, the folks at the Agency for International Development are handy, as are rustic souls from the Agriculture Department.

When the cheering contingent arrives at the White House, they are herded into an area and given flags (one each) of the U.S., or of the visiting nation.

When the cheering is over, the government crowds are taken back to their home agency and told to catch up on their work.

If an early morning demonstration (these are the hardest to arrange) is desired, employees at selected agencies are told they can come in late, if they will show up early at the White House instead. Guards at the executive mansion are briefed to let them in upon presentation of a proper pass issued by their agency. After that, the employees are expected to make it to work via regular transportation.

Although the system usually works well, it does have its drawbacks.

A couple of years ago, a group of State-AID-USIA workers were drafted for a cheer-the-king session, honoring a Middle East potentate who shall remain nameless.

President Johnson, all smiles, was the host.

As they walked through the welcoming throng, the visiting monarch spotted a State Department man whom he had known personally when the man was stationed in his country. He even remembered the man's name.

Upstaged by an 'Extra'

According to a very partial source (the man involved), President Johnson was visibly upset when the king and the State Department extra engaged in an animated conversation, upstaging the chief executive.

At one point, Mr. Johnson gave a behind-the-back signal to Secret Service agents accompanying the party. Although difficult to describe, it apparently was a get-that-jerk-out-of-here sign.

The agents coolly walked up behind the State Department man, and when the king turned to acknowledge some other flag wavers, hustled him away from the two world leaders. The State Department man has never been back to the White House, but he says he will always remember the day when he almost got to have lunch with the President and the king.

PEOPLE:

London reporter Erica Wallace hatched an egg yesterday after keeping it nestled in her bosom for 21 days. She said that she will name it after Princess Margaret's husband, Lord Snowdon—who inspired her into doing one of Fleet Street's weirdest stunts. Last month, Lord Snowdon filmed a *television program about* Britons and their pets, including a scene in which a woman hatched an egg in her bosom. But it turned out that the scene was only a reconstruction of an event that took place 11 years ago. Miss Wallace, a reporter for the Daily Sketch, decided to see if it still could be done. She said that her first act after becoming a mother was to send a birth announcement to The Times.

* * *

The Polish News Agency PAP did not mention Spiro T. Agnew. It may not even have been thinking about him, but its message was otherwise clear: Newspaper and television people are more to be pitied than censured. PAP reported on studies which indicate journalism is becoming one of the most hazardous professions for life expectancy and health. "For many years a high rate of death has been noted among young newsmen," Wojciech Brozowski, chairman of the Polish Labor Union of Press, Radio and Television, told PAP. "Of 225 newsmen who died in the last 15 years, the average age of death was 53. Only 20 newsmen in 100 have a chance of reaching retirement age. Disorders of the blood circulation, the respiratory system, stomach and neurosis are increasing among employees of news agencies, radio and TV." The reasons, said Brozowski, are "nervous tension, constant haste, an irregular way of life, long absences from home and excessive use of coffee and cigarettes."

* * *

What with the mails the way they are, it is doubtful that The Washington Post's Maxine Cheshire is aware of the Polish journalist's report. We are confident that it would make no difference; Miss Cheshire would continue to serve the cause of a free press in a democratic society. Following is her latest dispatch:

Chick's Debut Aide By a Bosom Friend

"If Tricia Nixon is su[...] tious, maybe she should a[...] another table the next tim[...] and Ed Cox make a reser[...] at New York's '21.'

"They were there on [...] day night and were ve[...] sistent about being seatec[...] table where they would [...] no one near them.
